2021 - 2028 Global Bird Repellent Market

The Global Bird Repellent Market is accounted for \$338.30 million in 2021 and is expected to reach \$495.40 million by 2028 growing at a CAGR of 5.6% during the forecast period. Bird repellents are widely used to deter or eliminate undesirable birds from landing, roosting and nesting in the house without harming the birds, or other animals. Bird repellents are also extensively used by fruit and grain producers. The agriculture & horticulture sector is the leading user of bird repellents, as the birds cause considerable damage to the crops and fruits by infringement and infestation. The rising infestation of birds on major field crops such as soybean, rice, and many others is affecting the overall quality and quantity of the crops, which will boost the product demand among food growers. Asia Pacific is projected to hold the largest market share owing to the rapid increase in awareness about bird repellent in agriculture & horticulture industry in China, India, Japan, and other Southeast Asian countries. Europe is projected to have the highest CAGR as European starlings are attracted to grain and other food processing operations and they nest in gutters or other holes in buildings that cause property damage and several infectious diseases.

Some of the key players profiled in the Bird Repellent Market include Bird B Gone, Inc., Bird Control Group, Martley Electronics, Bird Gard LLC., Bird X, Primetake Limited, Rentokil Initial, Leaven Enterprises, and Bird Deterrent Technologies.
