

Single-use Bioprocessing Material Market New Opportunities, Top Trends, Rising Demand, Emerging Growth

Single-use Bioprocessing Material Market by Product and End User Global Opportunity Analysis and Industry Forecast, 2017-2023.

PORTLAND, OREGON, UNITED STATES, February 7, 2022

/EINPresswire.com/ -- Single-use bioprocessing technology has gained significant traction in the recent years, owing to the rapid adoption of disposable bioprocessing equipment by pharmaceutical manufacturers. This has fueled the manufacturers to integrate different materials in the construction of single-use bioprocessing products. These products have also proved beneficial for the small scale pharmaceutical manufacturers. Hence, most biopharmaceutical companies utilize single-use bioprocessing technology for manufacturing vaccines, monoclonal antibodies, and other pharmaceutical components on commercial scale. This has spurred the demand for high-grade plastic and silicone materials in the development of SUB products.

- The silicone material segment accounted for second largest share in the global market in 2016 and is expected to maintain this trend throughout the forecast period.
- Other plastic material segment is anticipated to grow at the fastest pace from 2017-2023.
- Contract research organization & manufacturers registered highest growth in the global single-use bioprocessing material market during the forecast period.

- North America dominated the single-use bioprocessing material market in 2016 and is anticipated to maintain this trend throughout the forecast period.
- UK is anticipated to grow at the fastest pace in the European single-use bioprocessing market during the forecast period.

The polyethylene segment is the major contributor to the revenue generated by the plastic segment in 2016 and is anticipated to maintain this dominance throughout the forecast period. Variants of polyethylene, such as high-density polyethylene (HDPE), low-density polyethylene (LDPE), and medium-density polyethylene (MDPE) are used to manufacture single-use bioprocessing products. In addition, polyethylene is extensively used in the construction of media bags along with the films used in the bioprocess containers.

Moreover, biopharmaceutical manufacturers segment has dominated the global market in 2016 and is anticipated to maintain this trend throughout the forecast period. The major driving force of the increasing utilization of single-use bioprocessing systems is the collaboration between leading manufacturers and small-scale suppliers of filtration, container or closure systems, mixing systems, fermentation systems, and cell culture systems (bioreactors).

Neurological Biomarkers Market

Allied Market Research (AMR) is a full-service market research and business-consulting wing of Allied Analytics LLP based in Portland, Oregon. Allied Market Research provides global enterprises as well as medium and small businesses with unmatched quality of "Market Research Reports" and "Business Intelligence Solutions." AMR has a targeted view to provide business insights and consulting to assist its clients to make strategic business decisions and achieve sustainable growth in their respective market domains. AMR offers its services across 11 industry verticals including Life Sciences, Consumer Goods, Materials & Chemicals, Construction & Manufacturing, Food & Beverages, Energy & Power, Semiconductor & Electronics, Automotive & Transportation, ICT & Media, Aerospace & Defense, and BFSI.

We are in professional corporate relations with various companies and this helps us in digging out market data that helps us generate accurate research data tables and confirms utmost accuracy in our market forecasting. Allied Market Research CEO Pawan Kumar is instrumental in inspiring and encouraging everyone associated with the company to maintain high quality of data and help clients in every way possible to achieve success. Each and every data presented in the reports published by us is extracted through primary interviews with top officials from leading companies of the domain concerned. Our secondary data procurement methodology includes deep online and offline research and discussion with knowledgeable professionals and analysts in the industry.
