

Latin America Laboratory Automation Market Surveying Report, Drivers, Scope and Regional Analysis by 2021-2026

Looking forward, the Latin America laboratory automation market is expected to continue its moderate growth during the forecast period (2021-2026).

STE R SHERIDAN, WYOMING, UNITED STATES, February 7, 2022

/EINPresswire.com/ -- According to IMARC Group's latest report, titled "[Latin America Laboratory Automation Market](#):"

Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026", the Latin America laboratory automation market is currently witnessing moderate growth

in 2020. Laboratory automation stands for the utilization of a wide range of software, devices, and processes to minimize human intervention in lab procedures. It is mainly used for improving the efficiency of laboratory operations by automating various steps, including sorting, storing, decapping, retrieval, centrifugation, etc., with the help of robots, conveyors, machine vision technologies, etc. This assists in decreasing turnaround time, eliminating human errors, reducing costs, etc. As a result, laboratory automation finds extensive applications in diagnostic laboratories, biotechnology and pharmaceutical companies, research institutes, etc.

The escalating adoption of international medical standards for disease diagnosis is one of the primary factors driving the Latin America laboratory automation market. Moreover, these solutions are also used to maintain database management tools, patient test records, integrated workflow management systems, etc. Continuous improvements in laboratory informatics and automated data management solutions are further providing a thrust to the market growth. Additionally, laboratory automation systems are also gaining popularity for enhancing the productivity of the drug discovery process as they can operate for long durations with minimal

monitoring and instruction. Apart from this, the ability of laboratory automation to minimize labor costs and chances of errors by reducing manual work is further expected to catalyze the market growth in Latin America over the forecasted period. Looking forward, the Latin America laboratory automation market is expected to continue its moderate growth during the forecast period (2021-2026).

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the industry behaviors of the consumers globally and our estimates about the latest market trends and forecasts are being done after considering the impact of this pandemic.

Market Segmentation:

Breakup by Type:

- Modular Automation
- Whole Lab Automation

Breakup by Equipment and Software Type:

- Automated Clinical Laboratory Systems
- Workstations
- LIMS (Laboratory Information Management Systems)
- Sample Transport Systems
- Specimen Handling Systems
- Storage Retrieval Systems
- Automated Drug Discovery Laboratory Systems
- Plate Readers
- Automated Liquid Handling Systems
- LIMS (Laboratory Information Management Systems)
- Robotic Systems
- Storage Retrieval Systems
- Dissolution Testing Systems

Breakup by End User:

- Biotechnology and Pharmaceutical Companies
- Hospitals and Diagnostic Laboratories
- Research and Academic Institutes

Breakup by Country:

- Brazil

Mexico
Argentina
Columbia
Chile
Peru
Others

We are updating our reports, If you want latest primary and secondary data (2021-2026) with Cost Module, Business Strategy, Distribution Channel, etc. Click request free sample report, published report will be delivered to you in PDF format via email within 24 to 48 hours.

Key highlights of the report:

Market Performance (2015-2020)
Market Outlook (2021-2026)
Market Trends
Market Drivers and Success Factors
The Impact of COVID-19 on the Global Market
Value Chain Analysis
Structure of the Global Market
Comprehensive mapping of the competitive landscape

If you need specific information that is not currently within the scope of the report, we will provide it to you as a part of the customization.

About Us

IMARC Group is a leading market research company that offers management strategy and market research worldwide. We partner with clients in all sectors and regions to identify their highest-value opportunities, address their most critical challenges, and transform their businesses.

IMARC's information products include major market, scientific, economic and technological developments for business leaders in pharmaceutical, industrial, and high technology organizations. Market forecasts and industry analysis for biotechnology, advanced materials, pharmaceuticals, food and beverage, travel and tourism, nanotechnology and novel processing methods are at the top of the company's expertise.
