Market Dynamics

R&D of new drugs is expected to propel growth of the global eczema therapeutics market over the forecast period. For example, at the American Academy of Dermatology Annual Meeting, Regeneron Pharmaceuticals, Inc. presented the new analyses of Dupixent (dupilumab) in patients as young as 6 years with moderate-to-severe atopic dermatitis, in April 2021. The presentation was also made at the 20th European Society for Pediatric Dermatology Annual Meeting.

Moreover, high prevalence of atopic dermatitis is also expected to drive growth of the global

eczema therapeutics market. For instance, 15-20% of the children and 1-3% of the adults are currently suffering from atopic dermatitis or eczema worldwide, according to the article published in the Allergy and Asthma Network, in 2019.

Market Opportunities

R&D of new drugs is expected to offer lucrative growth opportunities for players in the global eczema therapeutics market. For example, in February 2021, a study by University of California, San Diego School of Medicine, reported that a universal strain of bacteria i.e. *Staphylococcus hominis* A9, derived from healthy human skin, can be used for the treatment of atopic dermatitis.

Covid-19 Impact Analysis

According to the Asthma and Allergy Foundation of America: 2020 report, the cases of dry skin, eczema, cracked skin, itchiness, and other skin conditions increased post pandemic as people began frequently washing hands and using hand sanitizers. Another study by Father Muller Medical College, India, reported that out of 582 people (291 healthcare professionals (HCPs) and 291 healthy individuals from the general population), 92.6% of HCPs and 68.7% of the general population showed hand dermatitis after following stringent hand hygiene during the COVID-19 pandemic.
