Menstrual cups are used during menstruation to collect menstrual fluid. They differ from sanitary napkins and tampons as these cups collect menstrual blood instead of absorbing it. There are two types of menstrual cups such as disposable and reusable. The reusable cups can be used for up to five years or more. This reduces their long-term cost than that of disposable tampons or pads, though the initial cost is higher.

Vietnam menstrual cups market is expected to exhibit significant growth during the forecast period due to

increase in awareness among the population about the available options during menstruation. Huge number of awareness campaigns conducted by women communities, educational institutes, and non-profit organizations also boost the growth of the market. In addition, rise in women populace coupled with high costs of sanitary pads and tampons further fuels the market growth.

00000-00 000000000:

- 1) The COVID-19 impact on the Vietnam Menstrual cups market is unpredictable and is expected to remain in force till the fourth quarter of 2021.
- 2) The COVID-19 outbreak forced governments across the globe to implement strict lockdowns and banned import-export of nonessential items for most of 2021. This led to sudden fall in the availability of important raw materials.
- 3) Moreover, nationwide lockdowns forced manufacturing facilities to partially or completely shut their operations.
- 4) Adverse impacts of the COVID-19 pandemic have resulted in delays in activities and initiatives regarding development of reliable and innovative drone analytics systems globally.

- •This report provides a detailed quantitative analysis of the current Vietnam Menstrual cups market trends and forecast estimations from 2019 to 2026, which assists to identify the prevailing market opportunities.
