sub-segments. The important key factors of Autonomous Underwater Vehicle Manufacturers market-changing economic instability and other competitive features are thoroughly recognized by experts SWOT, PESTEL, primary and secondary research procedures, and different analytic procedures are used to develop the Autonomous Underwater Vehicle Manufacturers consumer study.

The autonomous underwater vehicles are manufactured in many countries such as the U.S., France, Russia, and China. They were first introduced in the oil and gas industry, named C & C Technologies. C & C Technologies, headquartered in the U.S., is known to develop the first commercial autonomous underwater vehicle (AUV) for oil and gas exploration. The government of India has also implemented initiatives to increase the demand by permitting 100% foreign direct investment (FDI) in many sectors, including natural gas and petroleum sector. The initiative to increase demand in oil and gas industry will boost the autonomous underwater vehicle demand for submarines. According to India Brand Equity Foundation, in February 2021, government of India announced to invest about 7.5 trillion INR (US\$ 102.49 billion) on oil and gas infrastructure for the next five years. This is expected to increase the construction of oil and natural gas pipelines, which is expected to propel the growth of autonomous underwater vehicles market.
