While there are diverse viewpoints on the damage, which COVID-19 may cause, the fact remains that COVID-19 is spreading worldwide. New cases are rising in locations including, the US, Canada, Europe, Africa, the Middle East, India, Australia, South Korea, India, and Japan, among several other countries. Though the impacts on diverse businesses are well-known, the

technology sector is also facing the largest disruption in recent remembrance

COVID-19 Impact on Business Plan Software Market

According to World Health Organization (WHO) report, the US, Spain, Italy, France, Germany, the UK, Turkey, Iran, China, and Russia are some of the worst affected countries due to COVID-19 outbreak. The COVID-19 crisis is affecting the industries worldwide and the global economy is anticipated to take a worst hit in the year 2020 and likely in 2021 as well. The outbreak has created significant disruptions in primary industries such as consumer electronics, semiconductor, automotive, and IT infrastructure. All these industries are crucial for the growth of global business plan software market as they are the major demand generation industries for business plan software. The factory shutdowns, travel bans, trade bans, and border lockdowns to combat and contain the outbreak have impacted both manufacturing and sales of various consumer electronic products and components. The global electronics and semiconductor industry is one of the major industries that is suffering serious disruptions due to supply chain issues and manufacturing shutdowns.
