

Foot Drop Implants Market: Subdermal implant can boost family planning in India: Experts

Foot drop is a deviation from normal walking characterized with dropping of the forefoot caused due to weakness, irritation, damage to the common fibular nerve

PORTLAND, OREGON, UNITED STATES, February 8, 2022 /EINPresswire.com/ -- According to the report by Allied Market Research, titled, "[Foot Drop Implants Market](#) by Product (Functional Electrical Stimulators and Internal Fixation Devices); and End User (Hospitals, Palliative Care Centers, and Orthopedic Centers) - Global Opportunities and Industry Forecasts, 2020-2030". The report provides a detailed analysis of changing market dynamics, top segments, value chain, key investment pockets, regional scenario, and competitive landscape.

The major factors that contribute to the growth of the foot drop implants market include increasing nerve injuries leading to foot drop, high incidence of diabetic neuropathy, rising numbers of sports-related injuries & road traffic accidents, and growing demand for hip & knee replacement surgeries. However, high costs of the implants and lack of awareness about the implants in developing countries restrain the market growth. The development of foot drop implant products by key vendors and their availability in the market will further drive the market growth in the near future.
