

Tehama Awarded an Innovative Solutions Canada (ISC) Contract to Support Canada's Public Sector Hybrid Workforce

Tehama to provide its cloud-based, purpose-built platform for hybrid work to participating Canadian Public Sector organizations

OTTAWA, ONTARIO, CANADA, February 9, 2022 /EINPresswire.com/ -- [Tehama](#), an innovative, cloud-based platform supporting the future of work, today announced that it has been awarded a

contract by Innovative Solutions Canada. Innovative Solutions Canada is a Research and Development (R&D) funding program. Their funding streams help fund early-stage R&D projects, and tests prototypes in real-life settings. The two streams are dedicated to Canadian innovators who want to start, grow and get to market.

“

Tehama offers a scalable solution that can help government organizations optimize their operations, and safeguard sovereign data and intellectual property.”

Paul Vallee, CEO, Tehama

Tehama’s platform can help Canadian government organizations capitalize on the expanding digital economy that is being driven by the growing hybrid workforce. Enabling businesses and government entities to transform and sustain their evolving workforces, the [Tehama platform](#) delivers secure, compliant and location-independent services, positioning these organizations for long-term success without compromising productivity and collaboration. Additionally, the Tehama platform has the potential to assist Canada in optimizing the citizen and

employee experience while significantly reducing the cost of deploying and maintaining virtual desktops, by providing the cloud-based infrastructure needed to support remote and hybrid workforces.

“We are pleased to have been awarded this landmark contract by Innovative Solutions Canada,” said Paul Vallee, CEO, Tehama. “This represents a tremendous opportunity for our team to engage and to prove our ability to deliver a powerful and innovative platform supporting

Canada's Digital Strategy. Tehama offers a scalable solution that can help government organizations optimize their operations, and safeguard sovereign data and intellectual property."

Supporting Innovation Testing Procedures

One of Tehama's first initiatives under the ISC-TS contract will be to deliver the Tehama platform for testing, supported by a comprehensive program including training, technical support, oversight services and consulting services. As part of this project, and subsequent projects with Canada's Public Sector, Tehama will provide a cloud-native infrastructure, for real-world testing, taking on one of the biggest operational challenges facing governments today: the delivery of citizen and employee services within hybrid work environments.

"This initiative is just the first in a series of projects we hope to be involved in as part of the ISC-TS contract," continued Vallee. "We look forward to having the opportunity to play an even larger role, helping organizations of all types and sizes as they confront a systemic change to the very nature of work itself".

Canadian Public Sector entities across all levels of government that want more information on how to take advantage of the ISC contract with Tehama can contact Mr. Jim Short, Tehama's Global Public Sector Leader at short@tehama.io.

About Tehama

Tehama is the fastest, easiest, most secure way to deploy a hybrid workforce. With the Tehama platform, enterprises can create cloud-based virtual offices, rooms, and desktops anywhere in the world. No other solution on the market today connects remote workers with mission-critical and data-sensitive systems, with the speed, agility, and unparalleled security that Tehama offers.
