

Size & Share of IQF Meat and Poultry Market 2021-2030 And Anticipated To Reach USD 29.73 billion By 2030

Global IQF Meat and Poultry Market to surpass USD 29.73 billion by 2030 from USD 18.38 billion in 2020 at a CAGR of 6.3% in the coming years, i.e., 2021-30.

PHILADELPHIA, UNITED STATES , February 9, 2022 /EINPresswire.com/ -- Fatpos Global has released a report titled "[IQF Meat and Poultry Market](#) - Analysis of Market Size, Share & Trends for 2019 – 2020 and Forecasts to 2030" which is anticipated to reach USD 29.73 billion by 2030. According to a study by Fatpos Global, the market is anticipated to portray a CAGR of 6.3% between 2020 and 2030. According to the report, this growth is anticipated due to increasing mergers and acquisitions across various sectors which will create a worldwide demand for IQF Meat and Poultry. With the growth of basic infrastructure in various developing countries, as well as the easy availability of storage space and affordable prices, demand for IQF meat and poultry is expected to grow globally.

"Rising packaged food consumption and shifting lifestyles are two major factors driving the packed food industry, which will bolster the growth of the individual fast freezing market over the forecast period. With rising purchasing power parity (PPP), customers are willing to pay a higher price for non-seasonal fruits and vegetables that have a longer shelf life and have more nutritional value. With the growth of basic infrastructure in various developing countries, as well as the easy availability of storage space and affordable prices, demand for IQF meat and poultry is expected to grow globally", said a lead analyst at Fatpos Global.

Global IQF Meat and Poultry Market: Key Players

- Alm Group
- The Linde Group
- Forrester Ltd
- Pinnacle Foods
- Waltloo Meat & Chicken
- La Senda Frozen Food
- Brecon Foods Inc.
- Findus Group
- Kühne + Heitz, Unitemp
- Other Prominent Players

Individual fast freezing (IQF) is a popular method for keeping a wide range of fruits, vegetables, meat, poultry, and seafood products fresh for longer periods of time while also streamlining the supply chain and reducing the risk of product loss or injury. IQF is a method of freezing meat and poultry products at temperatures ranging from -30°C to -40°C, which preserves them for longer periods of time, often even a year, while preserving key characteristics such as taste, color, flavor, and texture before they are consumed. IQF meat and poultry products are kept at extremely low temperatures or in refrigerators ahead of time. The IQF technology is suitable for preserving meat and poultry because it prevents the growth of microorganisms that cause staleness and bad odor. The nutritional value and consistency of IQF meat and poultry products are expected to be the same after freezing as they are when they are fresh, which is a major factor driving the global growth of IQF meat and poultry products.
