#3200, SEATTLE, WASHINGTON, UNITED STATES, February 9, 2022 /EINPresswire.com/ -- Face recognition systems are widely used in public security, where they are used in conjunction with surveillance cameras to track criminals. Furthermore, since public awareness about security risks has grown, most public areas, such as airports, metro stations, open markets, nation borders, and other public places, have installed face recognition systems, which aid in the tracking of criminals. For example, three

Facial Recognition System Market

Panasonic facial recognition systems were installed at Tokyo International Airport's immigration check in October 2017. These were installed to authenticate a traveler's identity by comparing the traveler's face to the photo obtained by a face recognition system utilising the IC chip embedded in the person's passport. Furthermore, the market is predicted to rise due to the increasing usage of facial recognition systems by government bodies and defence authorities.
