

# Modified Starches Market Professional And In-Depth Study: Predictions Along With The Statistical Implication

*Europe is projected to grow at the fastest rate in the coming years owing to rising demand for modified starches from the paper industry, and textiles.*

NEW YORK, NEW YORK, UNITED STATES, February 10, 2022  
/EINPresswire.com/ -- Market Scope

## MODIFIED STARCHES MARKET

Market is expected to grow at a Significant CAGR During Forecast Period. Modified starches finds its application in the food industry (microwaveable ready meals, powdered soups, jams, and others.) and in the pulp and paper industry particularly in corrugated cardboard and paper to improve paper strength, surface appearance and others.

Modified Starches Market

Market Research Future (MRFR) assessed the [modified starches market](#) 2021 over the review period till 2022. As per MRFR analysis, the modified starches market is expected to thrive at 4.22% CAGR over the review period (between 2016 and 2022). By 2022, the modified starch market is expected to value USD 43.92 Mn. Insights on the global modified starches market published by MRFR expert researchers can aid new investors and people in business to take well-informed decisions.

### Market Drivers and Restraints

The easy accessibility of major sources of modified starch, such as corn, wheat, potato, tapioca, and cassava, and the presence of effective extraction methods can favor the modified starch market. The abundance of corn, the dominant source of modified starch, along with tapioca, as raw materials can benefit the market over the review tenure. The rapid adoption of modified starch in the expanding food and beverage industry, as the demand for confectionary surges, can improve the impetus of the market.

The modified starches can be used as food additives to enhance adhesion, binding, film formation, gel formation, moisture retention, texture, viscosity, and more. Other factors that lead to global modified starches market growth include moisture retention enhancement, stability, easy usability, effective function, growing demographics in the emerging economies, and subsequently increasing demand for packaged food.

The upscaling need for functional food products and the growing preference for clean label products can promote the modified starch market in the years to come. The increase in the need

for a modified starch market can be restrained by a weak supply chain. However, the adoption of automation solutions by the logistics department in top-notch companies and start-ups can counter the slow-down of the modified starch market in the near future. Additional causes that can favor the upsurge of the modified starch market are an increase in the number of manufacturers in different regions, favorable government policies for production, affordability, and easy availability of raw materials.
