SHERIDAN, WYOMING, UNITED STATES, February 9, 2022 /EINPresswire.com/ --

As per the latest report by IMARC Group, titled "[Sugar Substitutes Market](#):"

Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026," the global sugar substitutes market size exhibited moderate growth during 2015-

2020. Looking forward, IMARC Group expects the global sugar substitutes market to reach a value of US\$ 20.7 Billion by 2026. Sugar substitutes, or artificial sweeteners, refer to food additives used to replace table sugar (sucrose) to sweeten and enhance the flavor of edibles.

They contain low to zero calories and aid in weight loss, maintaining dental health and regulating blood sugar levels. As a result, sugar substitutes are widely used to prepare foods and beverages, such as candies, baked goods, canned foods, puddings, soft drinks and dairy products.

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

Global Sugar Substitutes Market Trends:

The global sugar substitutes market is primarily driven by the widespread prevalence of chronic diseases like obesity and diabetes due to sedentary lifestyles and consumption of sugar-loaded products. Additionally, the growing awareness regarding the negative health effects of sugar intake and shifting consumer preferences toward low-calorie foods have accelerated product adoption rates across the globe. Furthermore, the escalating demand for sugar-free items and
