

AV-Comparatives Awards 2021 for Bitdefender

Bitdefender participated successfully in AV-Comparatives' Enterprise and Consumer Main Test Series of 2021.

INNSBRUCK, TYROL, AUSTRIA, February 25, 2022 / EINPresswire.com/ -- [Bitdefender](#) participated successfully in [AV-Comparatives'](#) Enterprise and Consumer [Main Test Series](#) of 2021. The tests covered different protection scenarios, system performance, and false positives. In the consumer tests, Bitdefender achieved excellent results, earning it an Outstanding Product Award.

Bitdefender Internet Security is very straightforward to install and navigate, and has good scan options. We liked the ability to customise the tiles on the home page. Most commendably, malware on a USB drive is automatically detected when the drive is connected, and on-access protection means that files are scanned for malware if you try to copy them to your PC. Help features and access-control options are both excellent. Default options are very safe for non-expert users, while for power users, the Attack Timeline feature provides useful information for understanding threats.

“

These awards demonstrate the outstanding level reached by Bitdefender enterprise and consumer products in 2021.”

Andreas Clementi, founder and CEO, AV-Comparatives

Bitdefender GravityZone Elite provides a cloud-based console for managing the endpoint protection software. The product can administer networks with thousands of devices. We feel it would also be suitable for smaller businesses with tens of seats.

AV-Comparatives' tests are very carefully designed and executed to thoroughly and realistically simulate scenarios that face users in real life. Consequently, a certification by AV-Comparatives is a guarantee of an effective and reliable product. An "Approved Product" award means that the software has been rigorously checked to ensure that it will perform its intended task competently. It is an industry-recognised standard of quality.

AV-Comparatives' tests have multiple aspects, to represent the different requirements of IT security solutions. Further awards highlight the effectiveness of individual programs in different protection scenarios, low false positives, and low impact on system performance. Users can thus

see which programs score highly in the categories that matter most to them.

AV-Comparatives is an independent testing lab based in Innsbruck, Austria, that tests IT security products to see if they live up to their promises. AV-Comparatives is ISO 9001:2015 certified, having received a certificate from TÜV Austria for the scope "Independent Tests of Anti-Virus Software". AV-Comparatives is also the first av-test organisation to be certified by European Expert Group for IT-Security (EICAR) as an EICAR Trusted IT-Security Testing Lab.

AV-Comparatives Awards for Bitdefender

Bitdefender was very successful in AV-Comparatives' 2021 tests of consumer and enterprise software. It received the Approved Business Security Product Award for both the first and second runs of the Enterprise Main Test Series, and the Certified Enterprise ATP Product Award for the Enterprise Advanced Threat Protection Test. In the Endpoint Prevention & Response Test, it was certified as a Strategic Leader.

In the consumer tests, Bitdefender achieved excellent results. It reached the highest Advanced+ level in six tests of the Consumer Main Test Series, and Advanced in the remaining test. These results won it an Outstanding Product Award, as well as an Approved Security Product Award. It was also decorated for its results in individual tests: Gold for the Real-World Protection Test and Silver for the Malware Protection Test.

Finally, Bitdefender achieved Approved Product certifications for its mobile security, Mac security and anti-phishing products.
