INNSBRUCK, TYROL, AUSTRIA, February 24, 2022 /EINPresswire.com/ --

[NortonLifeLock](#) participated successfully in [AV-Comparatives' Consumer Main Test Series](#) of 2021.

The tests covered different protection scenarios, system performance, and false positives.

Norton 360 is very simple to set up, and has a very modern, touch-friendly interface. Essential features are easy to find, and safe default settings are provided. On-access protection means that files are scanned when you try to copy them to your PC. You can conveniently check a file using Norton's reputation service. Access control options are excellent.

AV-Comparatives' tests are very carefully designed and executed to thoroughly and realistically simulate scenarios that face users in real life. Consequently, a certification by AV-Comparatives is a guarantee of an effective and reliable product. An "Approved Product" award means that the software has been rigorously checked to ensure that it will perform its intended task competently. It is an industry-recognised standard of quality.

AV-Comparatives' tests have multiple aspects, to represent the different requirements of IT security solutions. Further awards highlight the effectiveness of individual programs in different protection scenarios, low false positives, and low impact on system performance. Users can thus
