

Geoscience Testing Lab in Sharaf DG Energy has completed the installation of 950 solar panels

DUBAI, UNITED ARAB EMIRATES, February 9, 2022 /EINPresswire.com/ -- Geoscience Testing Lab in Sharaf DG Energy has completed the installation of 950 solar panels. The project is a significant milestone for the company, as it will help generate 723,500 kilowatt-hours of electricity annually. The solar panels are installed on the roof of the building, which is a large-scale project. The company is committed to sustainable energy and reducing its carbon footprint. The project is a testament to the company's commitment to innovation and environmental responsibility.
