

How Are Stem Cell Therapy Market Players Benefitting From Their Competitors?

The Business Research Company's Stem Cell Therapy Global Market Report 2022 – Market Size, Trends, And Global Forecast 2022-2026

LONDON, GREATER LONDON, UK, February 10, 2022 /EINPresswire.com/ -- The companies in the global [stem cell therapy market](#) are increasingly investing in strategic partnerships. The strategic partnership is a mutually beneficial agreement between two companies that do not compete

directly with each other. For instance, in June 2020, Shanghai Cell Therapy Group (SHCell) has recently begun a six-year research collaboration with Professor Qi-Long Ying of the University of Southern California (USC). The Ying laboratory hopes to develop conditions for long-term ex vivo expansion of mouse and human hematopoietic stem and progenitor cells through the project, which is supported by \$3.6 million from the Baize Plan Fund.

The global stem cell therapy market size is expected to grow from \$10.67 billion in 2021 to \$11.99 billion in 2022 at a compound annual growth rate (CAGR) of 12.4%. The growth in the stem cell therapy market is mainly due to the companies resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The stem cell therapy market is expected to reach \$21.17 billion in 2026 at a CAGR of 15.3%.

The rising prevalence of chronic diseases contributed to the stem cell therapy market growth. Long working hours, limited physical activity, and unhealthy eating and drinking habits contribute to the prevalence of chronic diseases among people, thus driving the need for stem cell therapy. According to a United Nations article, by 2030, the proportion of global deaths due

Stem Cell Therapy Global Market Report 2022 – Market Size, Trends, And Global Forecast 2022-2026

to chronic diseases is expected to increase to 70% of total deaths. The global burden of chronic diseases is expected to reach about 60%. The rising prevalence of chronic diseases is expected to drive the stem cell therapy market.

Major players covered in the global stem cell therapy market are Anterogen, JCR Pharmaceuticals, Medipost, Osiris Therapeutics, Pharmicell, Astellas Pharma, Collectis, Celyad, Novadip Biosciences, Gamida Cell, Capricor Therapeutics, Cellular Dynamics, CESCO Therapeutics, DiscGenics, OxStem, Mesoblast, ReNeuron Group, Takeda Pharmaceuticals, Magellan, Kolon TissueGene, Stemedica Cell Technologies, Holostem Therapie Avanzate S.r.l., NuVasive, RTI Surgical and AlloSource.

TBRC's global stem cell therapy market report is segmented by type into allogeneic stem cell therapy, autologous stem cell therapy, by cell source into adult stem cells, induced pluripotent stem cells, embryonic stem cells, by application into musculoskeletal disorders, wounds and injuries, cancer, autoimmune disorders, others, by end-user into hospitals, clinics.

[Stem Cell Therapy Global Market Report 2022](#) – By Type (Allogeneic Stem Cell Therapy, Autologous Stem Cell Therapy), By Cell Source (Adult Stem Cells, Induced Pluripotent Stem Cells, Embryonic Stem Cells), By Application (Musculoskeletal Disorders, Wounds and Injuries, Cancer, Autoimmune Disorders), By End-User (Hospitals, Clinics) – Market Size, Trends, And Global Forecast 2022-2026 is one of a series of new reports from The Business Research Company that provides a stem cell therapy market overview, forecast stem cell therapy market size and growth for the whole market, stem cell therapy market segments, geographies, stem cell therapy market trends, stem cell therapy market drivers, restraints, leading competitors' revenues, profiles, and market shares.
