

# Urinary Incontinence Devices Market 2021-26: Share, Size, Growth, Outlook and Forecast

*IMARC Group expects the global urinary incontinence devices market to grow at a CAGR of around 7% during 2021-2026.*

SHERIDAN, WYOMING, UNITED STATES, February 11, 2022 /EINPresswire.com/ -- According to the latest report by IMARC Group "Urinary Incontinence Devices Market: Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026", The [global urinary incontinence devices market](#) exhibited moderate growth during 2015-2020. Looking forward, IMARC Group expects the market to grow at a CAGR of around 7% during 2021-2026.

Urinary incontinence is a medical condition that leads to the involuntary leakage of urine from the bladder. It can be treated using various devices that help strengthen and build pelvic floor muscles. These devices include vaginal slings, urinary catheters, electrical stimulation devices, and artificial urinary sphincters that assist in the effective, safe, and non-invasive treatment of stress, urge, and mixed urinary incontinence. Presently, several manufacturers are introducing small, tampon-like disposable devices to prevent urine leakage and support the urethra in women with vaginal prolapse.

Note: We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

## Market Trends:

Aged women are more likely to get affected with urinary incontinence due to menopause, pregnancy, and childbirth. Thus, a significant rise in the geriatric population represents one of the key factors bolstering the market growth. Moreover, neurological diseases, obesity, and diabetes, along with the consumption of foods like carbonated drinks, caffeine, chocolates, sweeteners, artificial chili peppers, and muscle relaxants, can increase the risk of developing urinary incontinence, which, in turn, is acting as another growth-inducing factor. Additionally, key manufacturers are offering innovative products to expand their product portfolio and gain a competitive edge, which is anticipated to drive the market.

## Breakup by Product:

- Urinary Catheters
- Vaginal Slings
- Electrical Stimulation Devices
- Artificial Urinary Sphincters
- Others

## Breakup by Category:

- External Urinary Incontinence Devices
- Internal Urinary Incontinence Devices

## Breakup by Incontinence Type:

- Stress Urinary Incontinence
- Urge Urinary Incontinence
- Overflow Urinary Incontinence
- Mixed Incontinence

## Breakup by Patient:

- Female
- Male

## Breakup by End User:

- Hospitals
- Ambulatory Surgical Centers
- Others

## Market Breakup by Region:

- North America (United States, Canada)
- Asia Pacific (China, Japan, India, South Korea, Australia, Indonesia, Others)
- Europe (Germany, France, United Kingdom, Italy, Spain, Russia, Others)
- Latin America (Brazil, Mexico, Others)
- Middle East and Africa

## Competitive Landscape with Key Player:

B. Braun Melsungen AG

Baxter International Inc  
Becton Dickinson and Company  
Boston Scientific Corporation  
Caldera Medical Inc.  
Coloplast A/S  
ConvaTec Group plc  
Cook Group Inc.  
Johnson & Johnson  
Kimberly-Clark Corporation  
Laborie Medical Technologies Inc.  
Medtronic plc  
Teleflex Incorporated.
