

BostonSight Research Advances Education and Innovation in Ocular Surface Disease Treatment

Shares Finding to Benefit the Eye Care Industry

NEEDHAM, MA, UNITED STATES, February 15, 2022 /EINPresswire.com/ -- [BostonSight®](#), a nonprofit healthcare organization that advances the treatment of diseased or damaged corneas

and dry eye continues to expand its [clinical research](#) as part of its mission to educate patients and doctors about the care and treatment of the ocular surface.

“

We envision a world where no one suffers loss of sight from corneal irregularities or ocular surface disease.”

Dr. Daniel Brocks, MD, CMO

“Research and publishing are core components of our mission,” said Dr. Daniel Brocks, MD, BostonSight’s Chief Medical Officer. “We envision a world where no one suffers loss of sight from corneal irregularities or ocular surface

disease. To work toward that vision, we conduct research and share our findings with other providers with the hope that our work will benefit the eye care industry as a whole.”

BostonSight conducts clinical research trials to find improved solutions for patients suffering from ocular surface disease. The research team is currently conducting four studies, including one that evaluates an at-home lens coating system for patients who use scleral lenses. Lens coating can provide a better lens wearing experience by minimizing deposits and fogging and increasing lubricity, enhancing patient comfort. For a full list of research studies go to <https://www.bostonsight.org/our-research/>.

In 2021, an analysis in Contact Lens and Anterior Eye listed BostonSight as the leading institution providing scleral contact lens-related articles. Recently, the research team published a peer-reviewed article about the efficacy of scleral lenses for patients with ocular GvHD. A full list of BostonSight’s peer-reviewed [publications](#) can be found at <https://www.bostonsight.org/our-research/our-publications/>.

In addition, research advances scleral lens technology developed by BostonSight for PROSE® treatment and BostonSight SCLERAL®.
