Avocado oil is edible product used in various food recipes, salad dressings, bakery items, and sweet and savory snacks. It is also used in personal care and cosmetics products owing to its moisturizing and regenerative properties. The oil has high monounsaturated fat and low saturated fat content, and it is free of cholesterol. Avocado oil is highly preferred by people with diabetes as regular consumption of this oil helps lower low-density lipid (LDL), i.e., bad cholesterol, levels. Avocado oil is high in vitamin E and potassium, which keep the blood vessels healthy by eliminating free radicals. The consumption of food prepared using avocado oil also alters the levels of essential fatty oils in kidneys.

Rising prevalence of lifestyle disorders such as diabetes, obesity, cardiovascular disorders, etc. due to the high consumption of high-fat butter and oils is projected to increase the demand for healthy oils such as avocado oil. Incidences of lifestyle diseases are mounting across the globe. According to the World Health Organization (WHO), more than 17 million people across the globe die of cardiovascular diseases (CVD) each year, mainly due to strokes and heart attacks. Cardiovascular diseases occur almost equally among men and women. Although heart attacks and strokes are the major reason for death in major parts of the world, 80% of premature deaths causes can be avoided by controlling the main risk factors such as physical inactivity and unhealthy diet.

#### Impact of COVID-19 Pandemic on Avocado Oil Market

The COVID-19 pandemic originated in Wuhan (China) in December 2019, and since then, it has spread across the globe at a fast pace. The US, Brazil, India, Russia, Italy, China, Spain, France and Germany are among the worst-affected countries in terms confirmed cases and reported deaths as of June 2020. The pandemic has affected economies and industries due to enforced lockdowns, travel bans, and business shutdowns. Chemical and materials is one of the world's major industries suffering serious disruptions such as supply chain breaks, technology events cancellations, and office shutdowns as a result of this outbreak. The global economic break down due to COVID-19 is also affecting the growth of the Avocado Oil market growth due to shutting down of factories and obstacles in supply chain.

The avocado oil market, by type, is segmented into extra virgin, virgin, refined, and blends. In 2018, the extra virgin segment dominated the market. This type of avocado oil is derived by pressing the Hass and the Fuerte type of avocado fruits. The extra virgin avocado oil from the Hass cultivar has a smoke point at temperature above 250°C, making it suitable for frying. The growing consumption of healthy and nutritious cooking oil by the health-conscious consumers drives the growth of the market for the extra virgin avocado oil.

Based on geography, the global avocado oil market is broadly segmented into North America, Europe, Asia Pacific (APAC), Middle East and Africa (MEA), and South America. North America

accounted for the largest share of the market in 2018, followed by APAC.

## Avocado Oil Market: Competitive Landscape and Key Developments
