

# Natural colored diamonds investment Opportunities

ONTARIO, CANADA, February 11, 2022

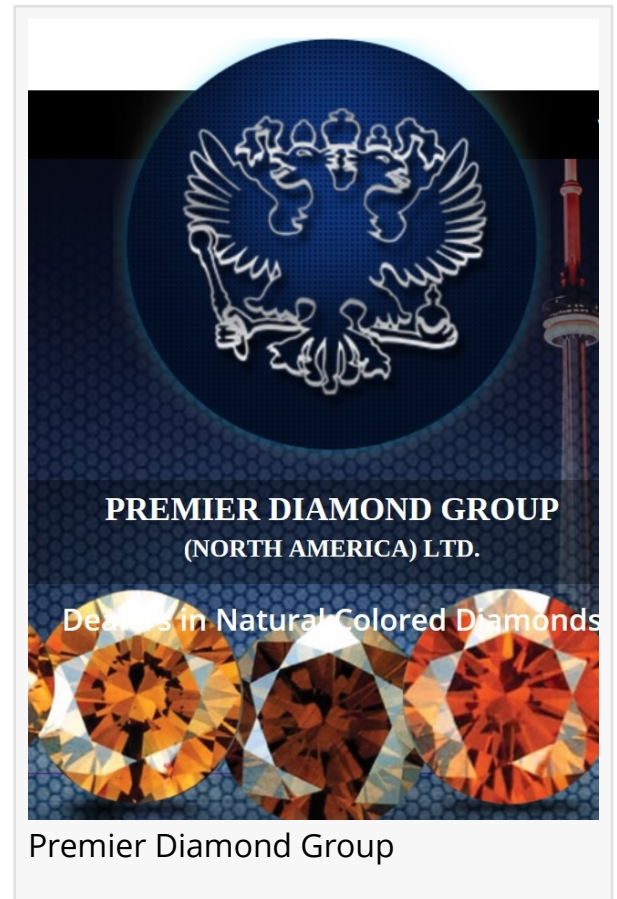

[/EINPresswire.com/](https://www.einpresswire.com/) -- Investment opportunities exist in natural colored diamonds. Similar to any other investment commodity, supply and demand influence value. Natural colored diamonds of the right intensity level, size, and characteristics can be considered a very wise and affordable investment opportunity.

When compared to many of the world's most successful and valuable commodities and their appreciation over the years, fancy vivid yellow diamonds, for example, have proven that they do not only rise in value over time, they far surpass other commodities such as stocks, bonds, gold and even oil.

Fancy Vivid Yellow Diamonds have been sold over the past decade in various sizes and many have managed to bring over \$100,000 per carat. However, natural fancy color diamonds are rarely ever seen. In fact, on a scale of rarity, all fancy color diamonds are incredibly rare when compared to many of the more unique items available in the market today. "They are rare enough due to the fact that only 0.01% of the diamonds is a natural colored diamond (1 of 10,000 diamonds)," explains experts at Natural Colored.

Scarcity of natural colored diamonds makes it difficult to procure, and this rarity has been hastened by the closure of the Rio Tinto that has drastically decreased the supply of pink diamonds; by so doing, the demand has skyrocketed. For investors, this is an opportunity to invest in an asset that brings benefits of double digit yearly increases, according to Financial Times.

Double digit increases are rewarding. Investing in rare natural fancy colored diamonds and precious colored gemstones introduces diversification to investor's portfolio by providing shelter from paper assets and the uncertainty found within individual financial markets.

Before investing, however, do due diligence and seek expertise. There are vast resources on natural yellow diamonds available to the public. However, the President of [Premier Diamond Group](#) (North America) Ltd, Mr. David Metcalfe provides expert advice and he has access to the global market. He is a pioneer in the branding of natural colored diamonds as a hedge against excessive market volatility brought about by speculation and government credit excesses.
