The Indonesia prepaid cards market is majorly being driven by the various initiatives undertaken by the Government of Indonesia through several projects and schemes, such as the cashless toll road scheme in 2017. Moreover, the widespread adoption of point of service (POS), ATM facilities and EDC terminals and the rising consumer inclination towards prepaid cards are propelling the market growth. Additionally, the accelerating penetration of smartphones, rising internet penetration and the growth of the e-commerce industry are propelling the market growth. Additionally, the rising utilization of prepaid cards in different verticals, such as corporates, business, retail and government organizations, are creating a positive outlook for the market across Indonesia.

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the industry behaviors of the consumers globally and our estimates about the latest market trends and forecasts are being done after considering the impact of this pandemic.
