## Impact of COVID-19 on the Collagen Market

Due to restrictions during COVID-19, the supply chains are disrupted affecting the collagen market. The shortage of laborers, transportation challenges and suspension of daily operations at manufacturing sites has created challenging scenarios for this market. On the other hand,

pandemic has also raised awareness towards maintaining health. This provides opportunities for this market to grow to cater the increase in demand for nutritional products.

The gelatin market is the largest product segment by share in this market. The large share of this segment is mainly ascribed by health benefits and attractive properties such as elasticity, stability and consistency. Asia Pacific dominated the market by regional segmentation owing to rising geriatric population, adoption of collagen in food products, rising adoption of nutritional supplements and increasing usage of cosmetic products.
