The Global Oil and Gas Mobility Market is accounted for \$24.75 billion in 2021 and is expected to reach \$93.99 billion by 2028 growing at a CAGR of 21.0% during the forecast period. Oil and gas mobility is primarily used for transforming conventional practices used in the oil and gas industry into the mobile performance-driven approach. Oil and gas mobility ensures the maximum use of available resources driving efficiency and rescuing the operational costs. The mobile analytics segment is expected to have the largest share during the forecast period. Mobile analytics in oil and gas reduces the cycle time required for performing routine operations and ensures optimum utilization of resources available. It introduces the flexibility of doing tasks from any location at any time where work can be shared within the enterprise in real-time. This helps the management to make quick decisions without interrupting the workflow. North America is projected to hold the largest share in the market, due to the shift from vertical to horizontal wells is the most important change to occur over the last decade in the region, allowing for greater formation access, while only incrementally increasing the cost of the well.

Some of the key players profiled in the Oil and Gas Mobility Market include Accenture Plc, Cisco Systems, Microsoft Corporation, Oracle Corporation, SAP SE, Halliburton, Hewlett Packard Enterprise Co, IBM Corporation, Infosys Ltd, Wipro Ltd, and Cognizant Technology Solutions.
