

# Sustainable Lab speaks at Tokyo-London Financial Seminar, co-hosted by Tokyo Metropolitan Government and City of London

*Sustainable Lab, a pioneer in data science for sustainability, will take the stage to give a presentation on "the visualization of non-financial data".*

TOKYO, JAPAN, February 14, 2022 /EINPresswire.com/ -- Japanese fintech start-up [Sustainable Lab Inc.](#) will participate in the fintech-themed seminar "Tokyo-London Financial Seminar 2022," co-hosted by the Tokyo Metropolitan Government and the City of London Corporation.

Chief Financial Officer, Yuki Kishi, will speak at the corporate pitch in the program and give a presentation on its business, efforts and the latest trends about the visualization of non-financial data, including "the importance of non-financial data" and "FinTech and ESG". The visualization of non-financial data is becoming more and more important as Japan's Prime Minister Kishida mentioned at the end of 2021 that he aims to make it a rule in 2022, and it is expected that laws and regulations will be prepared in the near future.

□□Tokyo-London Financial Seminar 2022□~Future Prospects of FinTech~

Date and Time: February 15, 2022 8:30-10:00□GMT□

Venue: Online webinar□□Pre-registration required.

Participation fee: Free

URL: <https://www.financialsemi.metro.tokyo.lg.jp/en/index.html>

Speakers at the forefront of both cities' FinTech communities will take the stage to present on the latest trends and initiatives.

□□Profile of Yuki Kishi

He is a Chief Financial Officer at Sustainable Lab, joined the company's leadership team in 2022 with a primary focus on finance, business development and international expansion. Prior to Sustainable Lab, Yuki had worked as Director of Fintech and Brand & Retail at Plug and Play Japan for 3.5 years and Deutsche Bank Group in Japan for 8 years. He holds an MBA from

University of Cambridge and a BS from University of London, Queen Mary college.

□□About Sustainable Lab inc.

Sustainable Lab, founded in 2019, is a big data professional team using AI to analyze non-financial and SDGs big data for illuminating social-good companies while creating solutions for Sustainability Transformation□SX□. By using internationally recognized indicators as well as reported data, we can quantify the non-financial data (ESG/SDGs). This data is often discussed in qualitative terms; thus, we can make an integrated judgment of the corporation's environmental and social values with our work.
