Almost all parts of the moringa tree, including leaves, roots, and fruits, are eaten or used as

ingredients in traditional herbal medicines. The leaves and pods are commonly eaten in parts of Africa and India. In Western countries, the dried leaves are usually sold as dietary supplements, either in capsule or powdered form. Compared to the leaves, the pods have lower mineral and vitamin content; however, they are rich in vitamin C. The diet of people in the developing nations usually lacks vitamins, minerals, and protein. Moringa products serve to be a vital source of many essential nutrients and antioxidants. Antioxidants are the compounds acting against free radicals in the body. Higher levels of free radicals can lead to oxidative stress, which can be associated with chronic diseases such as heart diseases and type 2 diabetes. Over the past few years, consumers have become more aware of the advantages of moringa products, which is likely to boost the moringa products market.

Impact of COVID-19 Pandemic on Moringa Products Market

The COVID-19 pandemic first began in Wuhan, China, in December 2019, and since then, it has spread at a fast pace worldwide. As of September 2020, the US, Brazil, India, Russia, Peru, South Africa, Mexico, and the UK are some of the worst affected countries in terms confirmed cases and reported deaths. The outbreak has been affecting economies and industries in various countries due to lockdowns, travel bans, and business shutdowns. Food & beverages is one of the major industries suffering serious disruptions, such as office and factory shutdowns, and supply chain breaks, as a result of this outbreak.

Under the product segment, the leaf powder segment accounted for the largest share in the global moringa products market. The demand for moringa is increasing from dietary supplements, cosmetics and pharmaceutical end use industries. Moring leaf powder helps to make useful medicines and helps to cure a wide variety of skin problems. The leaf extracts are also used to treat some stomach disorders including gastritis, constipation, and ulcerative colitis. Moreover, the antibiotic and antibacterial properties displayed by moringa leaf powder is also used to restrict the growth of various pathogens. Also, moringa powder have much longer life span and can be easily transported, which makes it highly preferred form of moringa products as compared to the other forms.

The European market comprises countries such as Germany, France, Spain, the UK, and Russia, among others. The European market for moringa and moringa products is still underdeveloped. Only an acute portion of European consumers know about moringa and its attributed advantages. Therefore, awareness regarding the advantages and benefits of moringa is necessary among a significantly large portion of the population in the region. Moreover, moringa production in Europe has been recorded to be insignificant, and the demands are met via imports. As per the global perspective, India is the largest producer and supplier of moringa. With increasing health-consciousness among the consumers, the demand for moringa products in the region is expected to continue to grow over the forecast period. The consumption of

moringa is high in Europe, and the primary application of the plant parts include food supplements. The dried leaves of moringa are marketed and consumed for a wide range of health benefits in Europe.
