

Multi-Mode Receiver Market - Size, Share, Growth, Opportunities, Industry Trends and Forecast 2022-2027

SHERIDAN, WYOMING, UNITED STATES, February 15, 2022 /EINPresswire.com/ -- According to the latest report by IMARC Group, titled "[Global Multi-Mode Receiver Market](#): Global Industry Trends, Share, Size, Growth, Opportunity and Forecast 2022-2027," the market is expected to reach US\$ 1,404.6 Million by 2027, exhibiting at a CAGR of 4.10% during 2022-2027.

A multi-mode receiver (MMR) is an advanced integrated navigational system that combines multiple navigation functionalities into a single and compact unit. It integrates signals from the global positioning system (GPS) landing system, GNSS landing system (GLS), instrument landing system (ILS), and microwave landing system to offer high precision. It offers an effective and economical solution for state-of-the-art facilities with better avionics and a customized setup.

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the industry behaviours of the consumers globally and our estimates about the latest market trends and forecasts are being done after considering the impact of this pandemic.

Global Multi-Mode Receiver Market Trends:

MMR integrates multiple stand-alone receivers into one unit and enhances the [security](#) level of the [aircraft](#) while reducing the overall power consumption and operational cost. This, along with the rising need to reduce the weight, maximize space utilization, and enhance the efficiency of the aircraft, represents one of the major factors propelling the market growth. Besides this, as MMR minimizes the complexity of monitoring multiple receivers, the increasing aircraft deliveries, rapid urbanization, inflating disposable income levels, and technological advancements in the aviation industry are bolstering the market growth.
