A lithium-ion battery, or Li-ion battery (LIB), is a rechargeable battery with a high energy density. A typical Li-ion battery includes three components, namely the anode, cathode and electrolyte. Currently, there are various types of Li-ion batteries available in the market that operate by releasing Li-ion from different forms of compounds. As compared to nickel-cadmium batteries, these batteries require low maintenance and have a much lower self-discharge. Owing to these properties, they are considered ideal for modern fuel gauge applications.

Over the years, there has been a rise in the demand for Li-ion batteries in grid energy storage due to the increasing demand for electricity and rapid fluctuations in supply. Also, the development of new technologies has led to the increased usage of various electronic devices

worldwide, such as digital cameras, smartphones and tablets. These devices are being embedded with unique features that consume more energy, owing to which the devices require to be recharged frequently. Such advancements have given rise to the demand for high-quality rechargeable batteries. However, the industry can witness fluctuations in the logistics costs of Li-ion batteries due to changes in the regulatory framework regarding their transportation. In 2019, the US Department of Transport's Pipeline and Hazardous Materials Safety Administration (USDOT/PHMSA) harmonized its Hazardous Materials Regulations (HMR) with the international regulations. The new rules include various requirements, prohibitions and allowances, including a ban on the transportation of li-ion or batteries as cargo, on passenger aircraft. Looking forward, IMARC Group expects the market continue its strong growth during the next five years.

Commercial Display Market 2021-2026 Competitive Analysis and Segmentation:

Competitive Landscape with Key Players:

The competitive landscape of the global commercial display market has been studied in the report with the detailed profiles of the key players operating in the market.

Some of these key players include:

Cdw Corporation
Cisco Systems, Inc.
Dell Technologies Inc.
Koninklijke Philips N.V.
LG Display Co., Ltd.
NEC Display Solutions.
Panasonic Corporation
Samsung Electronics Co., Ltd.
Sharp Corporation

Key Market Segmentation:

The report has segmented the global commercial display market on the basis of product type, technology, component, panel type, size, application and region.

Breakup by Product Type:

Digital Signage
Display Monitor
Display TVs

Breakup by Technology:

LCD
LED
Others

Breakup by Component:

Hardware
Software
Services

Breakup by Panel Type:

Flat Panel
Curved Panel
Other Panel

Breakup by Size:

Below 32 inches
32 to 52 inches
52 to 75 inches
Above 75 inches

Breakup by Application:

Retail
Hospitality
Entertainment
Stadiums & Playgrounds
Corporate
Banking
Healthcare
Education
Transportation

Breakup by Region:

North America
United States
Canada
Asia Pacific
China
Japan

India
South Korea
Australia
Indonesia
Others
Europe
Germany
France
United Kingdom
Italy
Spain
Russia
Others
Latin America
Brazil
Mexico
Others
Middle East and Africa
