"The first question attorney Erik Karst of Karst von Oiste will ask a plumber or waterworks worker who now has mesothelioma is-do you recall the specifics of how you were exposed to asbestos? For a plumber anywhere in Washington State their exposure to asbestos probably included repairing boilers-furnaces, changing out pipe valves-gaskets, repairing water pumps, or insulating pipes. For a waterworks worker it probably would have been all the above-plus installing or removing concrete pipes. Before 1982 waterworks workers worked around concrete pipes-that probably contained asbestos.
