

The Advocate Recommends Attorney Erik Karst of the law firm of Karst von Oiste to a Navy Veteran with Lung Cancer in Wisconsin-Who Had Navy Asbestos Exposure before 1982-Compensation May Exceed \$100,000

MILWAUKEE , WISCONSIN , USA, April 8, 2022 /EINPresswire.com/ -- The Wisconsin US Navy Veterans Lung Cancer Advocate says, "If you are a Navy Veteran who has just been diagnosed with lung cancer in Wisconsin and prior to 1982 you had heavy-extreme exposure to asbestos on a navy ship, submarine or at a shipyard-- please call attorney Erik Karst of the law firm of Karst von Oiste at 800-714-0303 to discuss financial compensation. Compensation for a person like this might be in the hundreds of thousands of dollars--depending on the specifics of how they were exposed to asbestos.

"Most people who had significant exposure to asbestos in the navy or at work and then develop lung cancer years after the exposure do not realize the \$30 billion dollar asbestos trust funds were set up for them too. To qualify for compensation the person with lung cancer must have been exposed to asbestos before 1982 and their lung cancer diagnosis must not be older than the last 12 months. Most importantly of all they must be able to get specific about how they were exposed to asbestos in the navy or at work.

"For more information, please call attorney Erik Karst of Karst von Oiste at 800-714-0303 if the person we have described sounds like you or your loved one." www.karstvoniste.com/

The Wisconsin US Navy Veterans Lung Cancer Advocate's free services are available to people with asbestos exposure lung cancer or mesothelioma in Milwaukee, Madison, Green Bay, Kenosha, Racine, Appleton, Oshkosh or anywhere in Wisconsin.

High-risk work groups for exposure to asbestos in Wisconsin include US Navy Veterans, a worker at one of Wisconsin's numerous power plants, pulp, or paper mill workers, manufacturing workers, public utility workers, plumbers, electricians, welders, millwrights, boiler technicians, insulators, auto mechanics, machinists, or construction workers. Typically, the exposure to asbestos occurred in the 1950's, 1960's, 1970's, or 1980's.
