

SISCO (Security Identification Systems Corporation) – Adds SaaS Model FAST-PASS 7 Visitor Management to its Offerings

WEST PALM BEACH, FLORIDA, US, February 23, 2022 /EINPresswire.com/ -- Security Identification Systems Corporation – [SISCO](https://www.siscocorp.com), makers of world-class visitor management systems, now offers a SaaS version of its [FAST-PASS 7](https://www.siscocorp.com/fast-pass-7) software using Microsoft Azure computing services.

SaaS, software as a service, is a model where software is licensed on a subscription basis and is centrally hosted, usually in the Cloud. The software maker hosts and maintains the servers (or contracts with a hosting specialist), databases, and the code that makes up an application. The application is accessed from any device with an internet connection and a web browser. Customers are freed from complex software and hardware management, and SaaS improves accessibility, scalability, and reliability while minimizing overhead and maintenance costs.

“The Software as a Service (SAAS) market has been growing and is expected to exceed \$305 Billion by 2026. As more companies adopt the use of the internet for common applications- email, calendaring, and office tools-- more customers are asking for this option. This is a natural progression for our software offering, said Greg Ruhl, President of SISCO. He added, “we still provide the other platform for those organizations that have requirements that prevent them from adopting SaaS.”

For the FAST-PASS 7 visitor management system by SISCO, the choice of platforms is now: On-Premise, or Software as a Service (SaaS).
