Segments:

The Global Electronic security system market has now been segmented among various segments of type and end-users.

Among the type segment, the market is bifurcated into intrusion detection, access control,

vehicle security, and video surveillance.

Among the end-user segment, the market has included BFSI, healthcare, industrial, residential, and government.

Regional Analysis

The regional study of the electronic security system market covers regions such as Europe, North America, Asia Pacific, and others. The market is responding to a shift in the demand for security services from the advanced nations to the emerging nations in the previous few years. The North American region is responsible for the major market portion in the electronic security system market especially due to the growing safety awareness among residential and industrial end-users. The North American nations particularly the U.S. is responsible for the major market portion in the electronic security system market owing to influences such as increasing implementation of the security technology by government and commercial end-users, increasing concentration on significant infrastructure protection, severe government protocols and developments in the technical products in the region. The countries in the APAC region particularly China is anticipated to be the fastest increasing region in the forecast period from 2016 to 2022, primarily because it is a major manufacturing hub for the electronic security systems and also owing to the growing number of construction operations in the region.

Key Players

The key players of e-security Market report include 3D Datacom (U.S.) (Sweden), Bosch Security Systems (Germany), 3VR Security, Inc. (U.S.) (U.S.), Honeywell international Inc. (U.S.), A&B Security Group (U.S.) , Panasonic System Networks Co. Ltd (Japan), Sony Corporation (Japan), Schneider Electric (France), Cisco Systems, Inc. (U.S.) , A-TEC security system, Inc. (U.S.) and others.
