

# Artificial Intelligence in the Education Sector Market Size, Share, Growth, Trend and Forecast Till 2027

*The global artificial intelligence in the education sector market is expected to reach a market size of USD 17.83 Billion by 2027*

SURREY, BRITISH COLUMBIA, CANADA ,  
February 21, 2022 /EINPresswire.com/

-- The study on the Global Artificial Intelligence in the Education Sector Market is the latest report covering the impact analysis of the currently ongoing COVID-19 pandemic. The pandemic has directly affected the market by causing disruptions in the

global supply chains and indirectly by inducing financial difficulties. The Artificial Intelligence in the Education Sector market has witnessed dynamic changes in trends and demands owing to the ongoing COVID-19 pandemic. The report provides a detailed outlook on how the pandemic has affected the key segments of the Artificial Intelligence in the Education Sector industry. The report includes an in-depth impact analysis of the COVID-19 pandemic on the overall Artificial Intelligence in the Education Sector industry. The report contains unbiased industry expert opinions on the current market scenario, past market performance, production & consumption rates, demand & supply ratio, and revenue generation forecasts over the estimated period.

The global artificial intelligence in the education sector market is expected to reach a market size of USD 17.83 Billion by 2027 and register a significantly high CAGR, according to latest analysis by Emergen Research. Rising demand for real-time learner's progress monitoring and analysis solution is a primary factor driving growth of the global artificial intelligence in the education sector market, and this is further expected to increase exponentially over the forecast period. Growing demand for artificial intelligence (AI) technology to simplify administrative processes in institutions is projected to further propel global artificial intelligence in the education sector market growth during the forecast period. Rising venture capital funding in EdTech companies is also expected to boost growth of the global artificial intelligence in the education sector market over the next few years.

Market Scope:

One of the report's central components is the broad Artificial Intelligence in the Education Sector market segmentation that includes the product type gamut, application spectrum, end-user industry landscape, significant geographical regions, and the top market contenders. The key players' financial positions, along with their gross profits, sales volumes, sales revenue, manufacturing costs, and other financial ratios, have been accurately gauged in the report. Furthermore, several analytical tools like investment assessment, SWOT analysis, and Porter's Five Forces Analysis have been implemented by our analysts' team to evaluate the production and distribution capacities of the Artificial Intelligence in the Education Sector market players.

This report on the global Artificial Intelligence in the Education Sector market gives a thorough study that is primarily focused on top players and their business stratagem, geographical extent, market segments, competitive landscape, manufacturing, and pricing and cost structures. Each section of the research study is explicitly prepared to explore crucial fragments of the global Artificial Intelligence in the Education Sector market.

In terms of revenue, the virtual learning environment segment is projected to account for high revenue share in the global artificial intelligence in the education sector market over the forecast period due to growing use of AI to improve online learning experience in higher education.

As a result of rising implementation of AI technology in colleges and universities to streamline admission processes, the higher education segment among the end-use segments is projected to account for largest revenue share contribution to the global market over the forecast period.

Due to the high presence of international market players, such as Google LLC, Microsoft Corporation, and Amazon Web Services, Inc., in countries in North America, and higher deployment of AI-based solutions, the market in this region is expected to account for the largest revenue share as compared to that of other regional markets in the global artificial intelligence in the education sector market over the forecast period.

Key market participants include Google LLC, Microsoft Corporation, Amazon Web Services, Inc., International Business Machines Corporation, Cognizant Technology Solutions Corp, Pearson PLC, Nuance Communications Inc., Blackboard Inc., Carnegie Learning, Inc., and Cognii, Inc.

TOC of the global Artificial Intelligence in the Education Sector market report:

Chapter 1, describes the Artificial Intelligence in the Education Sector Introduction, market

overview, product offerings, growth opportunities, market risks, driving forces, and challenges.

Chapter 2, analyzes the key manufacturers of Artificial Intelligence in the Education Sector, along with the sales, revenue, and price of Artificial Intelligence in the Education Sector, in the forecast period.

Chapter 3, studies the competitive situation among the major manufacturers and vendors, with sales, revenue, and market share.

Chapter 4, analyzes the global market by regions, with sales, revenue, and market share of Artificial Intelligence in the Education Sector, for each region, from 2020 to 2027.

Chapters 5, 6, 7, 8 and 9, analyze the Artificial Intelligence in the Education Sector market by type, application, regions, and manufacturers, with sales, revenue, and market share by key countries in these regions...Continued

Emergen Research has segmented the global artificial intelligence in the education sector market on the basis of deployment, technology, application, end-use, and region.

Deployment Outlook (Revenue, USD Billion; 2020–2027)

Cloud-based

On-premises

Technology Outlook (Revenue, USD Billion; 2020–2027)

Natural Language Processing

Deep Learning

Machine Learning

Application Outlook (Revenue, USD Billion; 2020–2027)

Virtual Learning Environment

Smart Content

Intelligent Tutoring Systems

Others

End-use Outlook (Revenue, USD Billion; 2020–2027)

K-12 Education

Higher Education

Corporate Learning

Key Points of Artificial Intelligence in the Education Sector Market:

Extensive coverage of the analysis of the Artificial Intelligence in the Education Sector market

Key insights into the regional spread of the industry in key geographies

Radical insights into the vital market trends; both current and emerging trends, and factors influencing the growth of the market

Comprehensive coverage of the impact of the COVID-19 pandemic on the overall growth of the Artificial Intelligence in the Education Sector market

Complete data about the key manufacturers and vendors in the Artificial Intelligence in the Education Sector market

Why choose emergent research ?

Extensive market scope covering all major offerings in the ecosystem

In-depth analysis for all the countries covered in each report

Current and upcoming trends impact analysis

Robust Research Methodology

Comprehensive Reports

Latest Technological Developments

## About Emergen Research

Emergen Research is a market research and consulting company that provides syndicated research reports, customized research reports, and consulting services. Our solutions purely focus on your purpose to locate, target, and analyze consumer behavior shifts across demographics, across industries, and help clients make smarter business decisions. We offer market intelligence studies ensuring relevant and fact-based research across multiple industries, including Healthcare, Touch Points, Chemicals, Types, and Energy.
