

Surgical Robotics Market Import Export Scenario, Application, Growing Trends and Forecast 2020-2027

The rise in the demand for minimally invasive surgeries among patients, improved healthcare infrastructure, and the introduction of advanced medical systems

VANCOUVER, BC, CANADA, February 21, 2022 /EINPresswire.com/ -- [Surgical Robotics Market](#) is projected to reach USD 9.59 billion in 2027. Rise in automation in the healthcare sector, high demand for minimally invasive treatments, and adoption of advanced technology in both developed and

developing economies are expected to boost the surgical robotics and navigation market growth. The major reason for non-compliance of surgical procedures is pain assisted with invasive method.

To acquire the major user acceptance market players in surgical robotics and navigation market are more focused in developing non-invasive and portable robotic platform. For instance, Versius Robotic System from CMR Surgical a UK based company has been used by NHS surgeons for minimal access surgery (MAS) in 2019. The portable design of robotic device permits free movement within ward and between various hospitals also help easy access in keyhole surgery.

The report offers precise information about pricing, capacity, value, gross revenue, and profit of the market. The primary aim of the report is to offer in depth details about market size, revenue growth and overall market dynamics to readers, stakeholders, companies to strengthen their share in the global Surgical Robotics market. It also provides in depth information about key factors, restraints, limitations, challenges along with various market segmentations such as product type, application and regional bifurcation.

The all-encompassing research weighs up on various aspects including but not limited to important industry definition, product applications, and product types. The pro-active approach towards analysis of investment feasibility, significant return on investment, supply chain management, import and export status, consumption volume and end-use offers more value to the overall statistics on the Surgical Robotics market. All factors that help business owners identify the next leg for growth are presented through self-explanatory resources such as charts, tables, and graphic images.

Further key findings

Ambulatory care centers for its highest amount of usage and extensive proliferation of the new ASCs in the developed countries are the factors driving the market growth substantially.

In February 2020, Midland Health had partnered with local neurosurgeons and Midland Memorial Hospital for providing small-cut robot-assisted spine surgery. The Mazor X Stealth Robotic Navigation system was used in the operation as it helps with image-based pre-operative analytics and provides intra-operative guidance during surgery.

Medtronic has acquired in 2018 Mazor Robotics in a robot-assisted surgery platform. Medtronic, acquisition was to develop fully-integrated surgical planning, to unite spine technologies with Mazor robotic system. Mazor X has received 510(k) clearance from the FDA, Mazor X and Stealth are used together in the robotic-assisted surgery.

North America has obtained a significant share in the Surgical Robotics market of about 47.2% due to the increase in the number of hospitals adopting robot-assisted surgeries, rise in the per capita income, and due to government initiatives for robotic inventions.

Competitive Terrain:

The Global Surgical Robotics Market is highly consolidated due to the presence of a large number of companies across this industry. The report discusses the current market standing of these companies, their past performances, demand and supply graph, production and consumption patterns, sales network, distribution channels, and growth opportunities in the market at length. The report scrutinizes the strategic approach of key market players towards expanding their product offerings and fortifying their market foothold. The leading market contenders listed in the report are as follows:

Medrobotics, Procept BioRobotics, Verb Surgical, DePuy Synthes, BrainLab, Titan Medical, Zimmer Biomet, Globus Medical, Auris Health, TransEnterix, Globus Medical, CMR Surgical, Getinge, Blue Belt Technologies, and ELMED Medical, among others.

Regional Analysis Covers:

North America (U.S., Canada)

Europe (U.K., Italy, Germany, France, Rest of EU)

Asia Pacific (India, Japan, China, South Korea, Australia, Rest of APAC)

Latin America (Chile, Brazil, Argentina, Rest of Latin America)

Middle East & Africa (Saudi Arabia, U.A.E., South Africa, Rest of MEA)

The all-inclusive report on the Global Surgical Robotics Market added by Emergen Research demonstrates that the global Surgical Robotics market is presumed to grow at a steady CAGR throughout the forecast timeline. The report analysed the key market drivers, restraints, growth opportunities, investment opportunities, threats, and limitations of the Surgical Robotics market. The report also offers accurate forecast estimation at a global and regional level to impart a better understanding of the scope of the market.

For the purpose of this report, Emergen Research has segmented into the global Surgical Robotics Market on the basis of Product Type, Applications, End Use and region:

Type Outlook (Revenue: USD Billion; 2017-2027)

Neurosurgery

Spinal surgery

ENT Surgery

Orthopedic Surgery

Robotic Radiosurgery System

Others

Applications Outlook (Revenue: USD Billion; 2017-2027)

Pediatrics

Adults

Geriatrics

End Use Outlook (Revenue: USD Billion; 2017-2027)

Hospitals

Ambulatory Care Centers

Others
