Important Attribute and highlights of the Report:

- Detailed analysis of the global market share

- Market Segmentation by solution, service, deployment type, organization size and vertical.
- Latest industry trends and developments
- Competitive Landscape for Facility Management Market
- Strategies of major players and product offerings

The global market is majorly driven by the increase in the adoption of cloud-based solutions. This, along with the change in organization structure and work management, is significantly contributing to the market growth. Furthermore, the growing demand for integrated facility management is catalyzing the market growth. Moreover, the increased demand for modernization of offices and streamlining services are propelling the market growth. Besides this, the increasing demand from the real estate sector in managing services like security, housekeeping, electrical, cleaning, mechanical, and civil engineering services is providing a boost to the market growth. Additionally, the growing demand for facility management solutions integrated with intelligent software is creating a positive outlook for the market.
