

Sensitive Data Discovery Industry To Reach \$34.53 Billion By 2030: Allied Market Research

The Sensitive Data discovery market is primarily divided on the basis of component, organization size, deployment mode, application, verticals, and region

PORTLAND, OR, UNITED STATES, February 22, 2022 /EINPresswire.com/ -- According to the report published by Allied Market Research, the global <u>Sensitive Data Discovery Industry</u> generated \$4.9 billion in 2020, and is

estimated to reach \$34.53 billion by 2030, witnessing a CAGR of 21.6% from 2021 to 2030. The report offers a detailed analysis of changing market trends, top segments, key investment pockets, value chain, regional landscape, and competitive scenario.

Increase in need to discover sensitive structured and unstructured data and rise in investments in data privacy measures with the evolving data privacy regulations drive the growth of the global Sensitive Data Discovery Industry. However, the lack of a skilled professional workforce and difficulties in justifying ROI restrain the market growth. On the other hand, demand to integrate data with business processes to derive actionable insights is estimated to present opportunities in the next few years.

Covid-19 Scenario:

- •During the Covid-19 pandemic, there has been surge in adoption of digital retail and e-commerce platforms as physical stores were closed to avoid cross-contamination. This led to rise in engagement of online payments as well as cyber-attacks such as frauds and identity thefts.
- •The demand for strong authentication services and high-quality security tools increased considerably to ward-off the cyber-attacks and ensure data protection.
- •With increase in awareness of data privacy and safety, organizations employed stringent security policies and availed support from cyber security experts.
