global generic drugs market

The [global generic drugs market](#) share reached a value of US\$ 386 Billion in 2020. Looking forward, IMARC Group expects the market to exhibit moderate growth during 2021-2026. A generic drug is an off-patented drug that is identical to other branded medicines in terms of effect, form, dosage, intended use, quality, and safety. These drugs can be manufactured only after the patent expiration of the brand-name drug. As compared to other branded drugs, these are less expensive and do not require extensive research and testing.
