

Oilseeds Market to reach \$382,474.0 million by 2031, with a CAGR of 4.1%

Increase the global consumption of soybean has led to its higher production, especially in Brazil & Argentina driving the market growth during forecast period.

PORTLAND, OR, UNITED STATES, February 23, 2022 /EINPresswire.com/ -- According to a new report published by Allied Market Research, titled, "[Oilseeds Market](#) by Oilseed Type, Product, Breeding Type and Biotech Trait: Global Opportunity Analysis and Industry Forecast, 2022-2031,"

The global oilseeds market size was valued at \$244,115.9 million in 2020, and is estimated to reach \$382,474.0 million by 2031, registering a CAGR of 4.1% from 2022 to 2031.

In 2020, the soybean segment accounted for approximately half of the share of the global market, in terms of revenue, and approximately three-fifths share in terms of volume. Oil seeds are crops or seeds cultivated for the extraction of edible oil for households and industrial purposes. The edible oil produced from oilseeds is used as feedstock for biodiesels production. The residual content of oilseeds is called as oil cake, and is used as animal feed. Copra, cottonseed, palm kernel, peanut, rapeseed, soybean, and sunflower seed are the major oilseeds used for extraction of oil.

Advancement in agricultural biotechnology has led to wider acceptance of genetically modified (GM) seeds, thereby increasing the area under cultivation of GM seeds across the globe. This helped to reduce the expenses to manage crop biotic stresses, such as weeds, insects, and microbial pests, leading to strong commercial success. Moreover, proactive government initiatives and surge in national & international associations to increase the agricultural production of oil to meet the need for food products are anticipated to fuel the oilseeds market growth.

However, uncertainty in climatic conditions leads to the lower production of oilseeds resulting in fluctuation of prices. Thus, continued volatility in the prices of oilseeds is anticipated to restrain the growth of the market. Moreover, rise in demand for vegetable oil/edible oil produced from oil seeds in the manufacturing of biodiesel is expected to provide lucrative opportunities to the market players.

Outbreak of COVID-19 positively affected the growth of the oilseeds market in 2020. For instance according to The Food and Agriculture Organization (FAO), in April, 2020, the exports of agriculture products dropped for most product groups with notable exception of oil seeds and leguminous fruits. Furthermore, increased demand for household edible oil and increased production of oilseeds were also attributed for the growth of the market in 2020.

According to the oilseeds market analysis, the oilseeds market segmented into oilseed type, product, breeding type, biotech trait and region. On the basis of oilseed type, the market is categorized into copra, cottonseed, palm kernel, peanut, rapeseed, soybean and sunflower seed. By product, it is bifurcated into animal feed and edible oil. Depending on breeding type, it is segregated into genetically modified and conventional. On the basis of biotech trait, market is bifurcated into herbicide tolerant, insecticide resistant and other stacked trait. Region wise, it is analyzed across North America (the U.S., Canada, and Mexico), Europe (Germany, Netherlands, Spain, France, Italy, UK, Russia, Ukraine and Rest of Europe), Asia-Pacific (China, India, Japan, Indonesia, South Korea and Rest of Asia-Pacific), and LAMEA (Brazil, Argentina, Paraguay, South Africa and Rest of LAMEA).

According to the oilseeds market trends, on the basis of oilseeds type, the cottonseed was valued at \$8,282.3 million in 2020, and is projected to reach \$11,309.9 million by 2031, growing at a CAGR of 2.8% from 2022 to 2031. Cottonseed hulls serve as an excellent source of feed for the livestock. Moreover, the cottonseed after the oil extraction is another feed product for the livestock. The cottonseed oil serves as a nutritious food and is used as a cooking oil for frying in both commercial and home cooking. Thus, above factors are likely to garner the growth of the market through cottonseed segment.

Byproduct, the edible oil segment accounted for the significant share in the global market in 2020 and is expected to increase its share during the forecast period. Oils are majorly extracted from oilseeds. They have been a part of human diet for ages and are being used in food, both for cooking and as supplements. Vegetable/edible oil extracted from oilseeds are rich source of oleic acid, essential fatty acids such as linoleic acid (Omega 6) and alpha-linoleic acid (Omega 3), monounsaturated fatty acids, as well as vitamin E (tocopherol) and vitamin K. Thus, surge in demand for edible oil from household and food service sectors is expected to garner the growth.

On the basis of breeding type, the genetically modified segment accounted for significant share in global oilseeds market and is expected to sustain its share throughout the oilseeds market forecast period. Advancement in agricultural biotechnology has been a major factor boosting the introduction of genetically modified (GM) oilseeds. In 2020, the GM seeds segment accounted for 53.4% share of the global market in terms of value, and is expected to grow at a CAGR of 4.4%.

The key players profiled in this report include Archer Daniels Midland Company, BASF SE, Bayer AG, Burrus Seed Farms, Inc, Cargill Incorporated, Corteva Agri science, Gansu Dunhuang Seed, Industry Group Co., Ltd., KWS SAAT SE & Co., Mahyco Seeds Ltd and Syngenta Crop Protection AG.

Key Findings Of The Study

In 2020, depending on oilseeds type, the peanut segment acquired \$48,378.2 million, garnering 19.8% of the global oilseeds market share.

In 2020, on the basis of product, the animal feed segment acquired \$139,143.2 million, exhibiting 57.0% of the global oilseeds market share.

In 2020, by breeding type, the conventional segment was valued at \$113,640.5 million, accounting for 46.6% of the market share.

In 2020, on the basis of biotech trait, the other stacked trait segment acquired \$105,637.8 million, exhibiting 43.3% of the global oilseeds market share.

China was the most prominent oilseeds market in Asia-Pacific in 2020, and is projected to reach \$115,632.6 million by 2031, growing at a CAGR of 3.3% during the forecast period.
