Plastic recycling refers to the reprocessing of post-industrial plastics into new materials. The most common types of plastic recycled by this method include polyethylene terephthalate (PET), high-density polyethylene (HDPE), low-density polyethylene (LDPE) and polypropylene (PP). Plastic recycling helps reduce landfill dependence, minimize plastic pollution, limit greenhouse emissions, and conserve resources.

The South Korea recycled plastics market is primarily driven by the increasing awareness about the ill effects of plastic wastes. Besides this, the rising usage of recycled plastic across industries, such as food and beverage (F&B), automotive, electronics, and packaging, is contributing to the market growth. In addition, the Government of South Korea is installing plastic recycling plants to process plastic waste into useful products and efficiently control waste production. Moreover, numerous technological advancements, such as the growing adoption of artificial intelligence (AI) for sorting plastic waste and enhancing the quality of recycled plastic products, are anticipated to fuel the market in the upcoming years.

## South Korea Recycled Plastics Market 2021-2026 Competitive Analysis and Segmentation:

### Competitive Landscape with Key Players:

The competitive landscape of the South Korea recycled plastics market has been studied in the report with the detailed profiles of the key players operating in the market.

### Key Market Segmentation:

The report has segmented the South Korea recycled plastics market on the basis of plastic type, raw material, application and region.

#### Breakup by Plastic Type:

- Polyethylene Terephthalate (PET)
- High Density Polyethylene (HDPE)
- Polypropylene (PP)
- Low Density Polyethylene (LDPE)
- Others

#### Breakup by Raw Material:

- Plastic Bottles
- Plastic Films
- Rigid Plastic and Foam
- Fibres
- Others

#### Breakup by Application:

- Non-Food Contact Packaging
- Food Contact Packaging
- Construction
- Automotive
- Others

#### Breakup by Region:

- East
- West
- Southwest
- Southeast

About Us

IMARC Group is a leading market research company that offers management strategy and market research worldwide. We partner with clients in all sectors and regions to identify their highest-value opportunities, address their most critical challenges, and transform their businesses.

IMARC's information products include major market, scientific, economic and technological developments for business leaders in pharmaceutical, industrial, and high technology organizations. Market forecasts and industry analysis for biotechnology, advanced materials, pharmaceuticals, food and beverage, travel and tourism, nanotechnology and novel processing methods are at the top of the company's expertise.
