

# Human Microbiome Therapeutics Market Demand, Size, Share, Scope & Forecast To 2027

*The rising application into personalized medicine and nutrition and growing technological advancements in metagenomics is driving the demand for the market.*

VANCOUVER, BC, CANADA, February 24, 2022 /EINPresswire.com/ --

The global [Human Microbiome Therapeutics Market](#) is forecasted to be worth USD 1,098.4 Million by 2027, according to a current analysis by Emergen Research. The human

microbiome therapeutics market is

forecasted to augment rapidly due to the rising application of human microbiome therapeutics into personalized medicine and nutrition. Besides, the growing technological advancements in metagenomics and the therapeutic system is anticipated to further propel the market growth over the forecasted timeframe.

The globally-disrupting incidence has impacted nearly every aspect of this business domain. However, the latest study expounds on the present market scenario and forecasts the pandemic's aftermath, with respect to this industry. Furthermore, the major aspects of the market have been discussed in the report, with expert opinions on the current status of the market.

However, huge infrastructure and equipment costs and complicated laboratory bacteria development and isolation procedures are likely to impede market growth over the forecast timeline.

Key Highlights From The Report

- In August 2019, the completion of the construction of a new state-of-the-art production facility had been announced by BiomX Ltd. The new facility is based in Ness Ziona and will facilitate the clinical development of candidate phage products for BiomX and may be extended in the coming years to satisfy commercial manufacturing requirements. The development has been a significant phase on the way to clinical development in this current period of live biotherapeutics, which involves phages and also human-derived cells and bacteria.

- During the forecast timeframe, the probiotics segment is expected to dominate the market. Probiotics are organisms, such as bacteria and yeasts, which provide health benefits when being consumed.

- The small molecule therapies segment accounted for the largest market share, and, due to its extensive use, it was anticipated to witness the highest growth over the forecast period.

Key participants include Oxidien Pharmaceuticals, LLC, BiomX Ltd., LNC Therapeutics SA, Commense Inc, Embion Technologies SA, DermBiont, Inc, CoreBiome, Inc., Carbiotix AB, Biotagenics Inc., and Finch Therapeutics, among others.

#### Competitive Outlook:

The global Human Microbiome Therapeutics market is highly consolidated due to the presence of a large number of companies across this industry. These companies are known to make hefty investments in research and development projects. Also, they control a considerable portion of the overall market share, thus limiting the entry of new players into the sector. The global Human Microbiome Therapeutics market report studies the prudent tactics undertaken by the leading market players, such as partnerships and collaborations, mergers & acquisitions, new product launches, and joint ventures.

#### Market Dynamics:

The report offers insightful information about the market dynamics of the Human Microbiome Therapeutics market. It offers SWOT analysis, PESTEL analysis, and Porter's Five Forces analysis to present a better understanding of the Human Microbiome Therapeutics market, competitive landscape, factors affecting it, and to predict the growth of the industry. It also offers the impact of various market factors along with the effects of the regulatory framework on the growth of the Human Microbiome Therapeutics market.

#### Competitive Landscape:

Furthermore, the report includes an in-depth analysis of the competitive landscape. The segment covers a comprehensive overview of the company profiles along with product profiles, production capacities, products/services, pricing analysis, profit margins, and manufacturing process developments. The report also covers strategic business measures undertaken by the

companies to gain substantial market share. The report provides insightful information about recent mergers and acquisitions, product launches, collaborations, joint ventures, partnerships, agreements, and government deals.

Emergen Research has segmented the global Human Microbiome Therapeutics Market on the basis of product, approach, therapeutic area, diseases, and region:

- Product Outlook (Revenue, USD Million; 2017-2027)

- o Prescription Drugs
- o Probiotics
- o Medical Foods
- o Prebiotics

- Approach Outlook (Revenue, USD Million; 2017-2027)

- o Microbial Consortia
- o Phage Cocktail
- o Small Molecule Therapies
- o Microbial Ecosystems
- o Genetically Modified Single Strain Bacteria
- o Single Strain Whole Bacteria

- Therapeutic Areas Outlook (Revenue, USD Million; 2017-2027)

- o Oncology
- o Autoimmune Disorders
- o Dermatological Disorders
- o Metabolic Disorders
- o Infectious Disease
- o Others

- Diseases Outlook (Revenue, USD Million; 2017-2027)

- o Crohn's Disease
- o Difficile
- o Diabetes
- o Irritable Bowel Syndrome
- o Others

- Regional Outlook (Revenue, USD Million; 2017-2027)

- o North America
  1. U.S.
  2. Canada
  3. Mexico
- o Europe

1. Germany
  2. UK
  3. France
  4. BENELUX
  5. Rest of Europe
- o Asia Pacific
1. China
  2. Japan
  3. South Korea
  4. India
  5. Rest of APAC
- o Latin America
1. Brazil
  2. Rest of LATAM
- o MEA
1. Saudi Arabia
  2. UAE
  3. Rest of MEA
