Market Trends

Significant growth in the information technology (IT) industry, along with the continuous rise in data consumption and widespread utilization of big data analytics and cloud-based system, represents one of the major factors driving the market. Apart from this, the construction of green data centers is gaining traction across the globe as these data centers use low emission building materials that facilitate efficient waste recycling. Moreover, extensive infrastructural developments, in confluence with the launch of liquid cooling technology and direct-to-cooling chip server racks to prevent overheating in data centers, are anticipated to strengthen the market growth.
