Report Metric

Historical: 2016-2021

Base Year: 2021

Forecast Year: 2022-2027

We are regularly tracking the direct effect of COVID-19 on the market, along with the indirect influence of associated industries. These observations will be integrated into the report.

Factoring, also known as debtor financing, refers to an asset-based financial arrangement. It involves a process of purchasing a debt or invoice at discounted prices from an organization to allow profits to the buyer upon settlement. Some of the common forms of the process are recourse, non-recourse, domestic, discourse, disclosed, export advance, and maturity factoring.

Market Trends

The expanding BFSI sector, along with the wide availability of financing services for micro, small and medium enterprises (MSME), is propelling the market growth. Additionally, the growing awareness towards numerous benefits of factoring in enabling the business to obtain working capital loans and mitigate credit risks is also driving the global market. Apart from this, the rising

Integration of blockchain technology and cryptocurrency with factoring solutions is further augmenting the market across the globe. In the coming years, the growing adoption of digital platforms in trade financing coupled with the increasing number of cross-border trade activities will continue to drive the growth of the global factoring market.
