

Food Intolerance Products Market Report 2021-26: Size, Growth, Trends, Share and Forecast

SHERIDAN, WY, UNITED STATES, February 24, 2022 /EINPresswire.com/ -- According to the latest report by IMARC Group, titled "[Food Intolerance Products Market Size: Global Industry Trends, Share, Growth, Opportunity and Forecast 2021-2026](#)," the global food intolerance products market is expected to grow at a CAGR of around 7% during the forecast period (2021-2026).

Food Intolerance Products Market

Report Metric

Historical: 2015-2020

Base Year: 2020

Forecast Year: 2021-2026

Food intolerance products are manufactured for individuals with the inability to digest products that contain dairy, [sugar](#), or gluten. These products comprise ingredients like soy, coconut, macadamia, chickpea, potato, soy flour, cashew, and rice. They are free from allergens and help prevent bloating, irritable bowel syndrome (IBS), sore throat, migraine, and other health problems.

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the industry behaviors of the consumers globally and our estimates about the latest market trends and forecasts are being done after considering the impact of this pandemic.

Food Intolerance Products Market Trends:

The increasing prevalence of celiac disease and lactose intolerance among the masses represents one of the key factors bolstering the growth of the market. In addition, the rising health consciousness is driving the adoption of food intolerance products to manage cholesterol and digestion. In line with this, manufacturers are emphasizing on producing nutrient-rich variants to meet the nutritional requirements of individuals. This, along with the easy product availability through online retail portals and increasing investments in aggressive promotional campaigns and influencer marketing by key players, is expected to positively influence the market.
