

Solvent-Free Rust Prevention for Aerospace Industry

Aircraft, airplanes, jets, flight vehicles, rockets, space exploration vehicles, spacecraft, and flight simulators all have unique concerns with rust protection

WINONA, MINN., USA, February 28, 2022

/EINPresswire.com/ -- Rust prevention in the aerospace industry requires special products, especially when it comes to corrosion control on sensitive aircraft engines, components, and related parts. The manufacturing and maintenance of aircraft, airplanes, jets, flight vehicles, rockets, space exploration vehicles, spacecraft, and flight simulators all have unique concerns with rust protection.

[HinderRUST](#)®, a popular rust-stopping product by Fluoramics, has many features that make it the lubricating rust stopper in the aerospace industry.

Solvent-Free Rust Prevention for Aerospace Industry

HinderRUST is 100% solvent free which means it lasts longer than other rust stoppers and can even be used in enclosed areas such as inside airplanes or rockets. Use HinderRUST to protect and preserve equipment, and as a maintenance item for those time when you can't paint.

“

HinderRUST is a great tool for the aerospace industry. Being solvent free, it can be used inside and outside rockets, spacecraft, and aircraft to lubricate moving parts and stop rust.”

Gregg Reick, President and Chief Engineer of Fluoramics

HinderRUST S4.0 is both a lubricant and a corrosion-stopping agent. It is used as a rust preventative tool and is particularly good at preventing interfacial corrosion or metal-on-metal corrosion. It is used as a maintenance item as it will stop corrosion in its tracks until scheduled maintenance can be completed.

HinderRUST is 100% solvent-free and is safe to use in enclosed areas. As the [Science of HinderRUST](#) explains, HinderRUST was engineered using a chemistry that works by displacing water and providing a boundary film between

metals, moisture, and air. Its mobility and wetting agents allow it to bond to the treated surfaces and travel beyond the immediate area to which it is applied. That makes it a great maintenance tool for those hard-to-reach areas. “HinderRUST is a great tool for the aerospace industry. Being
