Extrieve Image Repository v7 released with features to reduce storage requirements

Extrieve Technologies has introduced a new edition of their image repository service, aimed at making document storage easier for enterprise customers.

DELHI, INDIA, February 26, 2022 /EINPresswire.com/ -- [Extrieve Technologies](#) has launched a new edition of their image repository solution focused on simplifying enterprise document storage. This product has been used in high-volume production for nearly a decade, and the seventh version features enhanced document compression.

Extrieve Image Repository for enterprise document management.

Benefits

"

Image Repository makes it easy to store critical business documents to a centralized document repository."

- Simon

With this release storage requirements can be reduced up to 40% based on the type of documents that are stored in the repository. This release also helps to improve security without the complexity of encryption and key management

Major New Features.

1. Compression of the digital documents as part of storage. Retrieval as compressed or uncompressed formats. This is useful for storing legacy digital formats like word, ppt ,xls etc.

2. Scrabbling of documents to improve security. All documents are scrambled before it is saved.
