

India Generic Injectables Market 2021: Industry Trends, Size, Share, Growth and Forecast 2026

SHERIDAN, WYOMING, UNITED STATES, February 28, 2022 /EINPresswire.com/ -- According to the latest report by IMARC Group, titled "[India Generic Injectables Market](#): Industry Trends, Share, Size, Growth, Opportunity and Forecast 2021-2026," the india generic injectables market is expected to continue its robust growth in the forecast period (2021-2026).

India Generic Injectables Market Report

Generic injectables are pharmaceutical drugs with the similar active ingredients, strength, dosage, and administration route as that of their branded injectables. Some of common product variants, include Prevnar 13, Eliquis, Ibrance, Lyrica, Xeljanz, etc. [Generic injectable](#) facilitate the quick onset of action, precise and adjustable dosing, and predictable bioavailability. Moreover, these injectables cost lesser than their branded counterparts, which helps in managing overhead costs related to pharma products.

As the novel coronavirus (COVID-19) crisis takes over the world, we are continuously tracking the changes in the markets, as well as the industry behaviours of the consumers globally and our estimates about the latest market trends and forecasts are being done after considering the impact of this pandemic.

India Generic Injectables Market Trends:

The growing prevalence of chronic [diseases](#) in India, due to unhealthy dietary habits and sedentary lifestyles of the consumers, is primarily catalyzing the market for generic injectables market. Furthermore, the increasing investments by the Indian government to introduce innovative generic injectables for providing effective drug administration and enabling faster recovery of patients are also providing a thrust to the market. Additionally, several technological advancements in the drug delivery systems, such as the introduction of self-injection devices, are propelling the market growth. Various other factors, including increasing penetration of health

insurance companies and the upcoming patent expiry of several blockbuster medicines, are expected to further drive the market growth over the forecasted period.
