

Artificial Heart-Lung Machine Market Technology & Competitive Landscape Report with Focus on Key Markets & Methods 2030

Artificial heart-lung machine market provides an in-depth analysis of current trends and future estimations.

PORTLAND, OREGON, UNITED STATES, February 28, 2022

/EINPresswire.com/ -- An artificial heart-lung machine is used in open heart surgeries to support the proper functioning of the heart and body during the surgery. The heart-lung machine consists of a chamber that receives blood from the body, oxygenates the blood, and transfers it to all parts of the body. This machine is connected to the patient with a series of tubes, which is removed after the completion of the surgery when the heart and lungs resume its functions.
