

Water Based Colloidal Graphite Market is expected to surpass US\$ 1046.1 million, exhibiting at a CAGR of 5.7% 2021-2028

Colloidal graphite is made up of very fine graphite flakes suspended in liquids such as water, alcohol, petroleum oil, castor oil, glycerin, etc.

SEATTLE, WA, UNITED STATES, March 1, 2022 /EINPresswire.com/ -- According to Coherent Market Insights' analysis, The Global [Water Based Colloidal Graphite Market](#) is expected to grow due to increased demand from the forging and die-casting industries over the forecast period, Among regions, Asia Pacific dominated the global water based colloidal graphite market in 2020, accounting for 58.46% share, in terms of revenue, followed by Europe and Latin America, respectively. As a result of global water based colloidal graphite market is expected to grow in forecast period due to increased demand from the forging and die-casting industries.

Water Based Colloidal Graphite Market

Global Water Based Colloidal Graphite Market is expected to surpass US\$ 1046.1 million, exhibiting at a CAGR of 5.7% 2021-2028. The market is driven by the increasing demand for graphite in various applications, particularly in the automotive and aerospace industries. The market is also expected to grow due to the increasing demand for graphite in the construction and infrastructure sectors.

In addition to this, Coherent Market Insights has access to a wide range of the regional and global reputed paid data bases, which helps the company to figure out the regional and global water based colloidal graphite market trends and dynamics. The company analyses the water based colloidal graphite industry from the 360 Degree Perspective i.e. from the Supply Side and Demand Side which enables us to provide granular details of the entire ecosystem for each study. Finally, a Top-Down approach and Bottom-Up approach is followed to arrive at ultimate research findings in the water based colloidal graphite market.

For more information, contact:

North America: U.S., and Canada

Europe: U.K., Germany , Italy , Spain, Russia, and Rest of Europe

Asia Pacific: China, India , Japan, South Korea, ASEAN, Australia, and Rest of Asia Pacific

Latin America: Brazil, Mexico, Argentina, and Rest of Latin America

Middle East and Africa: Middle East and Africa

Detailed Segmentation:

Graphite is used in various applications, including:

Lubricant/Release Agent (Forging, Die Casting & Extrusion)

Anti-static Coatings

Conductive Ink

Others (Smart Fabrics etc.)

Key players in the market include:

American Elements, Asbury Carbons Inc., Benzer Dental AG, Chem-Verse Consultants (India) Private. Ltd. Fuchs Petrolub SE, Henkel AG. , Imerys S.A., Kaiyu Industrial (HK) Limited, Ted Pella, Inc., Quaker Houghton

Key developments in the market include:

In May 2017, the company announced that its graphite division - AMG Graphite, completed the commissioning process at its Ancuabe graphite mine in the Cabo Delgado province of Mozambique. Production has resume in May 2017, with an annual production capacity of 9,000 metric tons.

Key questions addressed in the report include:

What will the market size be in 2028 and at what rate will it grow?

What are the major growth driving factors for the market during the forecast period?

What are the trends in the market?

What are the key factors hampering growth of the market?

Which are the key players forming the competitive landscape?

What is the current market size?

Graphite is used in various applications, including:
Lubricant/Release Agent (Forging, Die Casting & Extrusion)
Anti-static Coatings
Conductive Ink
Others (Smart Fabrics etc.)

The COVID-19 had a negative influence on the global market for water-based colloidal graphite. Along with lockdown in China, India and The US other countries were also accountable for

disruptions in supply chain. Furthermore COVID-19 has had a major impact on the global economy in three ways: by directly impacting production and demand, by disrupting supply chains and marketplaces, and by having a financial impact on businesses and financial markets. As a result, all forging and die-casting production facilities were temporarily shut down, causing supply chain and logistics disruptions across the globe. As majority of water-based colloidal graphite is used in the forging and die-casting industries, therefore temporary shutdown of the die forging and die-casting industries, as well as the interruption of the supply chain, the global market for water-based colloidal graphite has been restricted during Covid-19 pandemics.

Coherent Market Insights follows a comprehensive research methodology focused on providing the most precise market analysis. The company leverages a data triangulation model which helps company to gauge the market dynamics and provide accurate estimates. Key components of the research methodologies followed for all our market reports include:

- Primary Research (Trade Surveys and Experts Interviews)
- Desk Research
- Proprietor Data Analytics Model

PRESS RELEASE:

Water Based Colloidal Graphite Market- <https://www.coherentmarketinsights.com/press-release/water-based-colloidal-graphite-market-4196>

About Us:

Coherent Market Insights is a global market intelligence and consulting organization that provides syndicated research reports, customized research reports, and consulting services. We are known for our actionable insights and authentic reports in various domains including aerospace and defense, agriculture, food and beverages, automotive, chemicals and materials, and virtually all domains and an exhaustive list of sub-domains under the sun. We create value for clients through our highly reliable and accurate reports. We are also committed in playing a leading role in offering insights in various sectors post-COVID-19 and continue to deliver measurable, sustainable results for our clients.
