

Increasing Demand for smart gadgets will Complement Growth of the Wearable Technology Market During 2022

Wearable Technology Market provides real time data monitoring, operational efficiency and fitness tracking which further supports the market growth.

PORTLAND, 5933 NE WIN SIVERS DRIVE, #205, OR 97220, UNITED STATE, March 2, 2022

/EINPresswire.com/ -- The wearable technology industry in Asia-Pacific is expected to grow at the fastest rate during the forecast period, owing to growth in urbanization, improved living standards of the consumers, and introduction of various innovative wearable features that help to minimize regular tasks. Furthermore, continuous economic development in countries such as India, China, and Australia is expected to provide numerous growth opportunities to the market.

According to a new report published by Allied Market Research, titled, Global [Wearable Technology Market](#) by Devices, Product type, Application, and Geography: Global Opportunity Analysis and Industry Forecast, 2014-2022, the wearable technology market size was \$19,633 million in 2015, and is projected to reach \$57,653 million by 2022, growing at a CAGR of 16.2% from 2016 to 2022. North America is expected to be the leading contributor to the global wearable technology market, followed by Europe and Asia-Pacific.

The growth of the global wearable technology market is driven by convenient usage of wearables and entry of various smartphone manufacturers. In addition, rise in health concerns among consumers fuels the adoption of wearable devices, which enable them to provide real-time information on their overall health. Multiple benefits offered by these devices such as GPS tracking, heart monitoring, and notification alert further supplement the wearable devices market growth. Moreover, rise in disposable income of consumers and increase in standard of living propel the growth of the global wearable technology market. However, increase in security concerns is projected to hamper the market growth, as the risk of data leakage is a major issue for users. Moreover, the limited battery life and high manufacturing cost restrain the market growth. Advancement in wearable devices technology is expected to provide numerous growth opportunities for the market.

In 2015, wrist wear segment accounted for the maximum revenue shares in the overall wearable

technology industry, owing to the flexibility provided by wearables. Moreover, wearables can be used to monitor heart rate and blood pressure, thus reducing the hospital bills. In addition, rise in demand for wearable devices from North American and European countries is expected to have a positive impact on the market growth, as these regions have strong economic base. The smartwatch segment is expected to witness the fastest growth, registering a CAGR of 19.9%. Technological advancements in wearable electronics such as introduction of smart rings, innovative body wear, baby monitors, and others are anticipated to provide growth opportunities for the market.

The fitness & sports segment dominated the wearable technology market with over 39% share in 2015, and is projected to maintain this trend throughout the forecast period. However, Entertainment sector is anticipated to grow at a highest CAGR of 35.7% during the forecast period. The growth of the consumer application is expected to be driven by increase in awareness of wearables and innovative features & benefits provided by the wearable product manufacturers.

North America accounted for the major share of the global wearable technology industry in 2015, and is expected to maintain its dominance during the forecast period, owing to rise in demand for convenient wearables. Asia-Pacific is estimated to grow at the highest rate due to increase in the adoption of technologically advanced products; growth in demand for smart wearables; and extensive economic growth in developing countries such as China and India.

Key findings of the Wearable Technology Market

In 2015, the wrist wear segment accounted for the maximum revenue, and is projected to grow at a notable CAGR of 16.6% during the forecast period.

North America held the highest market share in 2015, and is anticipated to dominate the global wearable technology market throughout the forecast period.

China is the major shareholder in the Asia-Pacific wearable technology market, accounting for more than 34% share in 2015.

Purchase Enquire :- <https://www.alliedmarketresearch.com/purchase-enquiry/355>

The key players profiled in the wearable technology industry include Apple Inc., Fitbit, Inc., Garmin Ltd., Adidas AG., Nike, Inc., Samsung Electronics Co., Ltd., Sony Corporation, Huawei Technologies Co., Ltd., LG Electronics Inc., and Motorola Solutions Inc. These players have adopted various strategies such as product launch, collaboration & partnership, and acquisition to expand their foothold in the wearable technology market. Apple introduced Apple Watch Nike+, which is an important tool for runners, pairing exclusive Nike Sport Bands with Apple Watch Series 2, which features GPS, a two times brighter display, water resistance up to 50 m, a powerful dual-core processor, and watchOS 3. The introduction of technologically advanced

products is likely to gain acceptance among the tech savvy people, specifically in developed regions of North America and Europe.

Table of Content :-

CHAPTER 1 INTRODUCTION

1.1. REPORT DESCRIPTION

1.2. KEY BENEFITS TO STAKEHOLDERS

1.3. KEY MARKET SEGMENTS

1.4. RESEARCH METHODOLOGY

1.4.1. Secondary research

1.4.2. Primary research

1.4.3. Analyst tools and models

CHAPTER 2 EXECUTIVE SUMMARY

2.1. CXO PERSPECTIVE

CHAPTER 3 MARKET OVERVIEW

3.1. MARKET DEFINITION AND SCOPE

3.2. KEY FINDINGS

3.2.1. Top impacting factors

3.2.2. Top winning strategies

3.2.3. Top investment pocket

3.3. PORTERS FIVE FORCES ANALYSIS

3.3.1. Moderate bargaining power of suppliers

3.3.2. Moderate bargaining power of buyers

3.3.3. Moderate threat of substitution

3.3.4. High threat of new entrants

3.3.5. High competitive rivalry
