Depending on resin type, the acrylic resin segment held the highest market share of around 31.2% in 2019, and is expected to maintain its dominance during the forecast period. This is owing to rise in demand for acrylic coatings from the construction industry applications such as finishing for roofs, decks, floors, bridges, and other applications. In addition, increase in demand for acrylic paints & coatings from marine & vessels, electrical, machinery & equipment, metals, and other applications is projected to fuel the paints & coatings market growth during the analyzed time frame.

On the basis of technology, the solvent-based technology segment holds the largest market share, in terms of revenue and volume, and is expected to maintain its dominance during the forecast period. This growth is attributed to rise in demand for solvent-based exterior coating from the applications where weather conditions are varying more frequently. In addition, solvent-based paints & coatings offer several advantages such as durability, strength, resistance

to scratches & abrasions, resistance to severe weather conditions, quick drying, and others, which in turn is expected to fuel the demand for this type of paints in the upcoming years.

#### COVID-19 impact on the market

The Saudi Arabia paints & coatings market is anticipated to witnessing steady and sluggish growth for the year 2020, owing to the outbreak of the COVID-19 pandemic. The outbreak has negatively impacted various industries across the country. In addition, ongoing projects from various industries such as construction, oil & gas, manufacturing, and others are on hold or cancelled, which has affected the sales of paints & coatings products. This further resulted in restraining the growth of the paints & coatings market till the effect of pandemic becomes less.

However, the COVID-19 impact eased in Saudi Arabia from September 2020, which resulted in rise in the sales of products and services in non-oil private sector such as trading, logistics services, food & beverage, and manufacturing. This is expected to drive the growth of the paints & coatings market in the Kingdom of Saudi Arabia post COVID-19 pandemic and is likely to increase the growth at the start of first quarter of 2021.
